# THE EVOLUTION OF CORPORATE LAW IN POST-COLONIAL INDIA: FROM TRANSPLANT TO AUTOCHTHONY

UMAKANTH VAROTTIL\*

## ABSTRACT

The essential thesis of this paper is that while Indian corporate law began as a legal transplant from England, it has been progressively decoupled from its source with subsequent amendments and reforms being focused either on finding solutions to local problems or borrowing from other jurisdictions. To that extent, decolonization has had a significant effect of radically altering the course of Indian corporate law. Current Indian corporate law not only represents a significant departure from its colonial origins, but the divergence between Indian law and English law as they have developed since independence has been increasing. While the Indian lawmaking process indulged in close cross-referencing of English legal provisions during the colonial period and immediately thereafter, the more contemporary legislative reforms pay scant regard to corporate law in the origin country that initially shaped Indian corporate law.

This offers valuable lessons. *First*, even though India is considered to be part of the “common law” family, corporate law has evolved somewhat differently from the origin country, England. In that sense, it casts significant doubt on the assumption that all countries within a legal family bear similarities. On the contrary, each host country may follow a trajectory that is different from that followed by the origin country of corporate law. *Second*, it supports the proposition that legal transplants can be challenging unless the local conditions in the host country are similar to that in the origin country. Variations in economic, social, political and cultural factors may bring about dissonance in the operation of a transplanted legal system. *Third*, a comparison of the historical colonial experience in the functioning of the transplanted legal system and the more contemporary experience in the post-colonial period suggests fragility in the foundations of the transplant.

Key words: Colonial continuities, India, corporate law, decolonization, legal transplant, English common law

## I. INTRODUCTION

Contemporary scholarship in comparative corporate law places emphasis on the influence of “legal families” or “legal origins,” in that the source of corporate law in any legal system plays a significant role in the evolution of such law and its relative success in protecting the interests of shareholders or other stakeholders. In doing so, legal systems are divided into those that belong to the common law family and others to the civil law family. One strand of this scholarship posits that if a jurisdiction provides better legal protection to investors (both in terms of the law and its enforcement), that will lead to capital markets, which are broader and better valued as compared to systems with lower protection.<sup>1</sup> Upon a comparison of the common law system and various civil law systems, it concludes that common law provides better protection to equity finance than civil law.<sup>2</sup> Although this theory has come under severe criticism,<sup>3</sup> the bifurcation of legal systems into common law and civil law and its influence in the evolution of corporate law has demonstrated persistence. Further work in this area has suggested that such a categorization cannot be viewed in absolute terms and must be subjected to

<sup>1</sup> An influential set of studies is encapsulated in a series of articles published in the late 1990s. These are Rafael La Porta, Florencio Lopez-de-Silanes, Andrei Shleifer & Robert Vishny, *Legal Determinants of External Finance*, 42 J. FIN. 1131 (1997), Rafael La Porta, Florencio Lopez-de-Silanes, Andrei Shleifer & Robert Vishny, *Law and Finance*, 106 J. POL. ECON. 1113 (1998); Rafael La Porta, Florencio Lopez-de-Silanes & Andrei Shleifer, *Corporate Ownership Around the World*, 54 J. FIN. 471 (1999) and Rafael La Porta, Florencio Lopez-de-Silanes, Andrei Shleifer & Robert Vishny, *Investor Protection and Corporate Governance*, 58 J. FIN. ECON. 3 (2000).

<sup>2</sup> La Porta, *et. al.*, *Legal Determinants of External Finance*, *supra* note 1 at 1137; La Porta, *et. al.*, *Law and Finance*, *supra* note 1 at 1116.

<sup>3</sup> For a brief survey of this literature, see John Armour & Priya Lele, *Law, Finance and Politics: The Case of India*, 43 LAW & SOC'Y REV. 491, 493-95 (2009). At the same time, various alternative theories have evolved to explain the differences between corporate law systems. These explore matters beyond the law, such as history, politics, interest groups and even anthropology and culture. See MARK J. ROE, STRONG MANAGERS, WEAK OWNERS: THE POLITICAL ROOTS OF AMERICAN CORPORATE FINANCE (1994); MARK J. ROE, POLITICAL DETERMINANTS OF CORPORATE GOVERNANCE: POLITICAL CONTEXT, CORPORATE IMPACT (2003); Raghuram G. Rajan & Luigi Zingales, *The Great Reversals: The Politics of Financial Development in the Twentieth Century*, 69 J. FIN. ECON. 5 (2003); RAGHURAM G. RAJAN & LUIGI ZINGALES, SAVING CAPITALISM FROM THE CAPITALISTS: UNLEASHING THE POWER OF FINANCIAL MARKETS TO CREATE WEALTH AND SPREAD OPPORTUNITY (2004); Amir N. Licht, *The Mother of All Path Dependencies: Toward a Cross-Cultural Theory of Corporate Governance Systems*, 26 DEL. J. CORP. L. 147 (2001).

nuanced analysis, as there could be considerable variation in corporate law in systems within each type of legal family.<sup>4</sup>

The diffusion of corporate law on the lines of legal families can be attributed to the phenomenon of “legal transplants,” particularly those that occurred during the colonial times in the eighteenth and nineteenth centuries that witnessed migration of entire systems of law from the empires to the colonies.<sup>5</sup> While the concept of legal transplants has received considerable affirmation in legal scholarship,<sup>6</sup> it has also been viewed with caution.<sup>7</sup> Mere importation of a legal rule or a statutory code without proper adaptation to local conditions is susceptible to failure.<sup>8</sup> This is on account of the fact that several social, political and economic factors that are present in the legal system of origin may not be present in the host country, or may be present with substantial variations, all of which make the importation a fairly complex exercise.<sup>9</sup> While legal transplants have been ubiquitous, their efficacy and stickiness may vary across jurisdictions as experiences have differed. Despite an evolved scholarship in this field, it is hard to identify a coherent theory that explains the utility and impact of legal transplants.

<sup>8</sup> *See* K. ZWEIGERT & H. KOTZ, *AN INTRODUCTION TO COMPARATIVE LAW* (1992).

<sup>9</sup> *See* Berkowitz, Pistor & Richard, *supra* note 5, at 168 observing as follows:

However, if the law was not adapted to local conditions, or if it was imposed via colonization and the population within the transplant was not familiar with the law, then we would expect that initial demand for using these laws to be weak. ... Countries that receive the law in this fashion are thus subject to the “transplant effect”: their legal order would function less effectively than origins or transplants that either adapted the local law to local conditions and/or had a population that was familiar with the transplanted law.

Given the colonial linkages of legal transplants, one potential avenue to measure their efficacy and acceptability would be to explore the evolution of the transplanted law in the host country during the colonial period as well as that following its decolonization.<sup>10</sup> It may be reasonable to hypothesize that if a law that has been transplanted into a host country during the colonial period does not fit with local conditions, the post-colonial free state may embark upon the process of radically departing from the transplanted law. Similarly, if the economic and social conditions alter significantly following the decolonization, one may expect changes to the law. It is only when there are legal and institutional similarities in the colonial and postcolonial period that inertia creeps in resulting in continuity in the transplanted law.<sup>11</sup> It may also be the case that colonial continuities may arise due to the insistence of the post-colonial state to rely upon the transplanted laws to advance its own interests, often at the cost of the rights and liberties of its citizens.<sup>12</sup>

In this theoretical backdrop, my aim in this paper is to test these phenomena by examining the evolution of corporate law<sup>13</sup> in India since its inception during the colonial period through India's emergence as an independent state and until the current period when it is growing to be one of the leading economies in the world.<sup>14</sup> The study of Indian corporate law is appealing on several counts that are intrinsic to the aforesaid analysis. India is uncontrovertibly a member of the "common law" family given its

<sup>13</sup> The use of the expression "corporate law" in this paper merits some explanation. While it essentially refers to companies' legislation, regulation and judicial decisions relating to company law, where relevant it also includes securities laws and regulations that deal with investor protection and corporate governance.

<sup>14</sup> Much has been said about the emergence of India as a leading economic power, which requires no further elaboration. See e.g. Goldman Sachs, *Global Economics Paper No. 99, Dreaming With BRICs: The Path to 2050* (2003), available at <http://www2.goldmansachs.com/ideas/brics/book/99-dreaming.pdf>.

colonial origins as part of the larger British Empire.<sup>15</sup> It offers an elegant platform for the study of legal transplants given that the inception of corporate law in India is a result of replication of English company law.<sup>16</sup> Finally, given that India has existed as an independent state following decolonization for over sixty years now, it is an apt test case for determining whether company law in that jurisdiction continues to demonstrate strict adherence to its colonial origins or whether it has instead sought to depart radically from the corporate law of its source country.

The evolution of corporate law in India can be traced back to the colonial era with several previous companies' legislation being modeled on parallel English legislation. The influence of colonial laws continued even after decolonization in 1947 when the most significant piece of corporate legislation, the Companies Act, 1956, was modeled on the English Companies Act of 1948. Although the Companies Act, 1956 was the result of a classic legal transplant, its evolution thereafter took on a different trajectory. Constant amendments to the Act were necessitated due to legislative requirements that arose due to local conditions and problems that were unique to the Indian corporate setting. Moreover, Indian courts too refused to accept English judgments without adjusting and adapting the legal principles to suit the conditions of Indian society.

The divergence between Indian corporate law and its English counterpart became clearer with India's economic liberalization in 1991. With the expansion of foreign investment and the development of India's capital markets, the focus of corporate law extended beyond the Companies Act, 1956 and into securities laws pertaining to or promulgated by the securities regulator, the Securities and Exchange Board of India. In this phase, while some influence of English laws did subsist, the Indian

<sup>16</sup> For a detailed discussion of such transplant, *see infra* Part II.

Parliament and regulators began to either look to other jurisdictions such as the United States (U.S.) to draw inspiration for legal reforms or indulged in soul-searching to mold customized solutions to India's unique problems.

The transition from legal transplant to autochthony<sup>17</sup> culminated in the recent enactment of the Companies Act, 2013 that is being brought into effect in parts so as to replace the Companies Act, 1956. The 2013 legislation is not only the result of nearly two decades of debates and discussions, but also a reaction to corporate law and governance problems that have plagued India more recently. The transition away from English company law is nearly complete as the reforms are almost entirely tailored to suit local needs.

The essential thesis of this paper is that while Indian corporate law began as a legal transplant from England, it has been progressively decoupled from its source with subsequent amendments and reforms being focused either on finding solutions to local problems or borrowing from other jurisdictions such as the U.S. To that extent, decolonization has had a significant effect of radically altering the course of Indian corporate law. Although the shift was not evident in the period immediately following decolonization, it began to take shape about a decade thereafter. Current Indian corporate law not only represents a significant departure from its colonial origins, but the divergence between Indian law and English law as they have developed since independence has been increasing. In that sense, decolonization can be metaphorically signified as a "fork in the road" when the Indian Parliament, after initial hesitation, sought to move away from the colonial origins and develop the law in a trajectory that is substantially different from the developments in the United Kingdom (U.K.). While the Indian lawmaking process indulged in close cross-referencing of English legal provisions during the colonial period and immediately thereafter, the more contemporary

---

<sup>17</sup> Autochthony is generally associated with something indigenous or "born from the soil," and contrasts with the connotation of a transplant. See Goh Yihan, *Tort Law in the Face of Land Scarcity in Singapore*, 26 *Ariz. J. Int'l & Comp. L.* 335, 353 (2009); Linda Bosniak, *Soil and Citizenship*, 82 *Fordham L. Rev.* 2069, 2074 (2014).

legislative reforms pay scant regard to corporate law in the origin country that initially shaped Indian corporate law.

The evolution of corporate law in post-colonial India offers valuable lessons. *First*, even though India is considered to be part of the “common law” family, corporate law has evolved somewhat differently from the origin country, England. In that sense, it casts significant doubt on the assumption that all countries within a legal family bear similarities. On the contrary, each host country may follow a trajectory that is different from that followed by the origin country of corporate law. This necessitates a more involved understanding of corporate law in the legal families. *Second*, it supports the proposition that legal transplants can be challenging unless the local conditions in the host country are similar to that in the origin country. Variations in economic, social, political and cultural factors may bring about dissonance in the operation of a transplanted legal system. *Third*, a comparison of the historical colonial experience in the functioning of the transplanted legal system and the more contemporary experience in the post-colonial period suggests fragility in the foundations of the transplant. As I seek to demonstrate in this paper, the radical shift in the trajectory of corporate law in the post-colonial period is suggestive of the fact that the transplant of English corporate law in colonial India was perhaps not consistent with the desires of the local populace thereby indicating problems of reception.

While there exists a burgeoning body of scholarship in the field of post-colonial theory specifically with reference to India,<sup>18</sup> its focus on corporate and commercial laws is scanty despite the prominence of these laws in the contemporary period. This paper attempts to fill the gap. It is also intended to supplement the growing body of research that seeks to determine the influence of colonial corporate laws in the post-colonial era,

both in former colonies of the British Empire<sup>19</sup> as well as other jurisdictions.<sup>20</sup> The historical and comparative analysis herein might also equip us to better understand contemporary corporate law in India.<sup>21</sup>

Part II contains a detailed historical discussion of the evolution of Indian corporate law from the colonial period until the current position. This will identify trends that can be gleaned in terms of the impact that decolonization had on the shape that corporate law took in India. Part III analyzes the changes brought about to Indian corporate law in the post-colonial period across several key aspects such as corporate personality and structure, corporate finance and capital structuring, corporate governance and the corporate law enforcement machinery. This Part also demonstrates the increasing divergence between English and Indian corporate law over time. Part IV concludes with an effort to correlate the findings in this paper to existing theoretical debates across different planes including comparative corporate law and post-colonial theory.

## II. HISTORICAL EVOLUTION OF CORPORATE LAW IN INDIA

A discussion of the historical trends in corporate law beginning with the colonial period through India's independence and during the post-colonial era will illuminate our

understanding of the trajectory adopted. A longitudinal study will help tease out the extent of colonial law's influence during the post-colonial period. This analysis, while primarily dealing with developments in the legal sphere, also takes into account economic and social circumstances prevailing at the relevant time.

In this Part, greater emphasis is placed on analyzing the legislative developments pertaining to corporate law in India, and to a lesser extent on case law. Particularly during the colonial period, the diffusion of English law to the colonies occurred through legislation.<sup>22</sup> The relevance of English case law arises only due to the interpretation of transplanted legislation that has parallels with English legislation.<sup>23</sup>

#### A. CORPORATE LAW DURING THE COLONIAL ERA (1850-1947)

Business organizations are not an altogether recent phenomenon in India. They existed in some form or the other in ancient India. Although they were essentially guilds or groups of businesspersons or artisans engaged in a similar activity, they displayed some of the features of a modern corporation, at least in a rudimentary form.<sup>24</sup> However, these business forms faded out during the series of invasions and other disturbances that preceded the advent of European traders in India at the end of the fifteenth century.<sup>25</sup>

The emergence of the modern business corporation in India can be attributed to the establishment of the English East India Company ("EIC") in 1600, which was granted

a royal charter that effectively conferred upon it a monopoly to trade in India.<sup>26</sup> Since then, other English companies received similar privileges and commenced activities in India.<sup>27</sup> It appears that for nearly two-and-a-half centuries, companies were established and carried on business in India without the existence of a specific body of law regulating companies. The establishment of companies in India, particularly banking companies, was nearly impossible given the “relentless opposition” of the EIC to the grant of any charters for companies in India.<sup>28</sup>

### 1. *Developments in the Nineteenth Century*

Specific company legislation made a debut in India only in the year 1850 when an Act for Registration of Joint Stock Companies was passed.<sup>29</sup> This legislation was passed along the lines of the Companies Act, 1844 in England and marks the beginning of an era when legislative developments in the corporate field in India merely kept up with developments in England.<sup>30</sup> In other words, Indian corporate law functioned as a continuum of transplants from English law, which phenomenon continued for a period of over a century, as I elaborate further. The oddity about the Act of 1850 was that registration was only optional as it conferred certain privileges.<sup>31</sup> Limited liability was not one such privilege, which is unsurprising given that the concept was yet to make inroads in England as yet. Although the Act of 1850 signifies an important milestone in Indian corporate law history as the maiden legislation in the field as it enacted key

legislative provisions for the management of joint stock companies for the first time,<sup>32</sup> it was rather ineffective given its optionality and the lack of protection for shareholders through limited liability.<sup>33</sup>

Limited liability was first introduced in England by way of the Joint Stock Companies Act, 1856,<sup>34</sup> although this protection was not available to banks and insurance companies.<sup>35</sup> This legislation underwent amendment in 1857.<sup>36</sup> In the same year, legislation was enacted in India conferring the limited liability protection to companies other than banking and insurance companies.<sup>37</sup> Thereafter, following an English legislation of 1858, the privilege of limited liability was extended to banking companies in India through the Act of 1860, although the same privilege was not extended to insurance companies.<sup>38</sup>

The pattern of mimicking English legislation continued even shortly thereafter. Following the enactment of the Companies Act of 1862 in England, a new legislation was passed in India in 1866 “for consolidating and amending the ‘laws relating to incorporation, regulation and winding up of Trading Companies and other Associations’.”<sup>39</sup> This legislation also made available the benefit of limited liability to insurance companies.<sup>40</sup> This consolidation exercise was meant to keep pace with the English Act.<sup>41</sup> Yet another consolidation effort was undertaken in India in the form of the

Companies Act of 1882 in order to incorporate the amendments in the English legislation since the early 1860s so as to make them applicable to the Indian context.<sup>42</sup>

## *2. Developments in the Twentieth Century*

Following the Companies Act of 1882, five different sets of amendments were made until the first decade of the twentieth century. Then, following the English Companies (Consolidation) Act, 1908, a new legislation was enacted in India in the form of the Companies Act, 1913.<sup>43</sup> This was “as were previous Acts, a close reproduction of the English Act §§ in its comparable provisions,” although it was recognized that “in certain particulars, the Indian Act differed from the English Act.”<sup>44</sup> Subsequently, following the enactment of the English Companies Act of 1929, significant amendments were made to Indian law by way of the Companies (Amendment) Act, 1936. A unique aspect of this legislative effort is that the Indian legislature decided to embark upon an amendment process rather than a reenactment along the lines of the 1929 English legislation, indicative for the first time of a hesitation in a wholesale transplant. The Statement of Objects and reasons of the 1936 amendments suggests that it was decided not to adopt the wholesale English legislation due to some unfavorable criticism it attracted, and also because of the recognition that problems peculiar to India had to be dealt with, especially those relating to the managing agency system.<sup>45</sup> This trend began emanating from the judiciary as well. Although it was common during the colonial period for courts to refer to English decisions,<sup>46</sup> they now began recognizing the fact that “where there is a positive enactment of the Indian legislature, the proper course is to examine the language of that statute and to ascertain its proper meaning uninfluenced by any

considerations derived from the previous state of the law – or of the English law upon which it may have been founded.”<sup>47</sup>

Since 1936 until Indian independence, the Indian Companies Act, 1913 underwent several further amendments principally to address certain defects in the legislation and also on account of constitutional developments such as the enactment of the Government of India Act, 1935. This position ensued until India’s independence that necessitated a further round of reforms.<sup>48</sup>

The following table tracks the chronology of legislative developments in England and India, which clearly demonstrates that the Indian legislature was simply following the lead from English law through an ongoing transplantation process.

TABLE 1: KEY LEGISLATIVE DEVELOPMENTS IN CORPORATE LAW IN ENGLAND AND INDIA<sup>49</sup>

<u>England</u>	<u>India</u>
Companies Act, 1844	Act for Registration of Joint Stock Companies, 1850
Limited Liability Act, 1855	Companies Act, 1857

<sup>48</sup> These reforms are discussed *infra* Part IIB2.

<sup>49</sup> *See also* Mahy & Ramsay, *supra* note 19, at 128-29 (for a discussion of the development of company law in the Straits Settlements and the Federated Malay States based on English law, much of which travelled through India).

### 3. The Impact of Corporate Lawmaking in the Colonial Era

A chronological analysis of legislative developments is by itself unsatisfactory as it does not inform us of the motives for introducing the legislation (primarily through continual legal transplants) and also the prevailing context in India that takes into account the economic and social factors.<sup>50</sup> In this sub-part, I seek to incorporate these factors and analyze the impact that corporate legislation had on Indian businesses in the colonial period, and also the motives behind the introduction of such legislation.<sup>51</sup> Two trends are quite evident in the colonial period. *First*, the transplant of English corporate law into India was to serve British business interests rather than to modernize Indian corporate law more generally. *Second*, English company law as transplanted to India operated as an instrument of market regulation, a sort of “colonial *laissez faire*.”<sup>52</sup>

The motive behind transplanting English company law into India was to facilitate better trade between England and India, which could be accomplished if there was symmetry in the corporate legislation between the two countries.<sup>53</sup> In other words, the familiarity of the British businesses with Indian corporate law was thought to minimise their risk in trading with that colony.<sup>54</sup> The motivation that the law in England and India should be the same was quite explicit in that it occupied a place in the Statement of Objects and Reasons of the Joint Stock Companies Act, 1856<sup>55</sup> and the Companies Act, 1882.<sup>56</sup> Rungta is unequivocal in his analysis:

---

<sup>50</sup> MCQUEEN, *supra* note 19, at 7.

<sup>51</sup> Historical literature on the evolution of Indian corporate law in the colonial period is quite limited, although the path breaking work of Radhe Shyam Rungta (focusing on the second half of the nineteenth century) and Ritu Birla (for a longer period) throws significant light on the social and economic conditions of the period as well as the legislative motives. RUNGTA, *supra* note 25; BIRLA, *supra* note 42. *See also* Ritu Birla, *Capitalist Subjects in Transition*, in DIPESH CHAKRABARTI, ROCHONA MAJUMDAR & ANDREW SARTORI (EDS.), *FROM THE COLONIAL TO THE POSTCOLONIAL: INDIA AND PAKISTAN IN TRANSITION* (2007). Rungta’s work on colonial corporate lawmaking in India has received acclaim in international literature dealing with transplant of English corporate law into other colonies. *See* MCQUEEN, *supra* note 19, at 279; Mahy & Ramsay, *supra* note 19.

<sup>52</sup> Birla, *supra* note 51, at 243.

<sup>53</sup> RUNGTA, *supra* note 25, at 68; McQueen, *supra* note 19, at 10.

<sup>54</sup> RUNGTA, *supra* note 25, at 68

<sup>55</sup> *Id.*

<sup>56</sup> BIRLA, *supra* note 42, at 40.

If there is any underlying theme running through the company legislation of a full half century in India, with the Act of 1850 somewhat excepted, it is a steadfast adherence to the policy that what was good for Britain must also be good for India. It was not that the legislators responsible for these Acts were not able men, some of them were well qualified and experienced in company affairs in India. ... What they seemed to lack the most was the will, rather than the wisdom, to change.<sup>57</sup>

The transplant of English law into India so as to favor British businesses was accompanied by a consequential impact, in that it often ran counter to local business interests.<sup>58</sup> It paid scant regard to the needs of local business forms such as the Hindu Undivided Family (HUF) and other kinship based indigenous business structures.<sup>59</sup> For example, it was unclear whether the Companies Act, 1882 operated to ensnare these local business forms when it required that all “partnerships” carrying on trading with more than twenty persons was required to be registered as a company under that Act.<sup>60</sup> In that sense, not only did the transplanted corporate legislation in India fail to take into account the needs of vernacular business forms, but also it often acted counter to their interests.

Since the transplanted law was intended to operate for the benefit of British traders and to free business “from the binds of tradition and ancient customary codes,”<sup>61</sup> it adopted a largely free-market ideology. This was consistent with developments within England at the time.<sup>62</sup> During the colonial period, law was used as an instrument to facilitate trade. As Birla notes:

---

<sup>57</sup> RUNGTA, *supra* note 25, at 214. Rungta’s observations that pertain to the second half of the nineteenth century largely hold good for the remainder of the colonial period spanning the first half of the twentieth century.

<sup>58</sup> MCQUEEN, *supra* note 19, at 10 (extrapolating Rungta’s conclusions).

<sup>59</sup> BIRLA, *supra* note 42, at 51-52 (referring to the local forms as “vernacular” commercial organizations).

<sup>60</sup> *Id.* at 51.

<sup>61</sup> *Id.* at 5.

<sup>62</sup> *Id.* at 35.

I would like to reconsider the performance of colonial sovereignty, this time as a staging of market actors and as an implementation of a certain kind of colonial laissez-faire, manifest in legal frameworks standardizing the 'free circulation' of credit and commodities, most especially in the institutionalization of the law of contract as operative mode for market exchange.<sup>63</sup>

In sum, the continuous transplantation of English law into India beginning in 1850 and ongoing until decolonization was motivated by the need to facilitate British businesses to trade with India, due to which it adopted a free-market approach. All of these had the effect of adversely impacting local business forms in one way or the other.

Yet, the colonial period in India witnessed the emergence of a rather unique form of management technique involving the use of managing agents to manage companies. Despite the close cross-referencing of Indian developments (both in the business and legislative spheres) with England, the evolution of the managing agency in India bears little connection with England and emerged on account of specific local requirements. Any historical account of corporate law in India would be incomplete without an analysis of the concept of managing agency, which also garnered significant attention of legislators during the initial years of the postcolonial period.

#### *4. Evolution of the Managing Agency System*

In nineteenth century India, the somewhat unique managing agency system emerged due to the necessities of "[h]istory, geography and economics."<sup>64</sup> As previously seen, Indian business history is replete with informal business structures based on family

---

<sup>63</sup> Birla, *supra* note 51, at 243.

<sup>64</sup> RUNGTA, *supra* note 25, at 220.

relations and kinship.<sup>65</sup> However, where businesspersons who did not have familial or kinship ties came together to contribute capital to a new idea and where only a few of them had the capabilities and interest in commercializing the idea through managing the operations, it became necessary to place the management of the business in the hands of the capable and willing businesspersons.<sup>66</sup> The passive investors had neither the time nor the intention to participate in the day-to-day management of the business. Hence, a system evolved whereby some of the investors would take responsibility for the management of the business. A process that began informally due to the trust capital and reputation available with those managing the business eventually took on a more formal structure.<sup>67</sup> Managing agencies were created in the form of partnerships or small corporations, which then entered into management contracts with businesses to manage them.<sup>68</sup>

Managing agencies soon became a dominant force in the colonial Indian corporate sphere. They began exercising control over several industries such as cotton, jute and tea, particularly in the Eastern part of the country.<sup>69</sup> In her work on business, race and politics in India explored through the managing agency system, Maria Misra finds that British firms rather than the domestic ones dominated the managing agency system.<sup>70</sup> Their strong presence in Indian business also made them a dominant member of the colonial community in the country.<sup>71</sup>

<sup>68</sup> Rosen, *supra* note 27, at 263.

<sup>69</sup> RUNGTA, *supra* note 25, at 227; Omkar Goswami, *Sahibs, Babus, and Baniyas: Changes in Industrial Control In Eastern India, 1918-50*, 48 *THE JOURNAL OF ASIAN STUDIES* 289 (1989).

<sup>70</sup> MARIA MISRA, *BUSINESS, RACE, AND POLITICS IN BRITISH INDIA, C. 1850-1960* 4 (1999) (noting: “Most British private direct investment in India in the colonial period was represented by the managing agencies, and by 1914 they controlled capital of over £ 200 million in India”). See also Goswami, *supra* note 69, at 292 (noting: “The British mercantile presence in eastern India on the eve of World War I was truly staggering. Of 849 tea plantations, 729 (86 percent) were managed by Britons”); RUNGTA, *supra* note 25, at 227 (finding: “... the number of European firms holding managing agencies was larger than the number of Indian firms”).

<sup>71</sup> MISRA, *supra* note 70, at 4.

Although the managing agency system was inherently meant to induce efficiency and arose out of necessity, its functioning was soon mired in a great deal of controversy. It gave rise to the possibility of grave abuse.<sup>72</sup> The managing agents began to enrich themselves at the cost of the passive investors,<sup>73</sup> who were unable to monitor the managing agents due to the problem of information asymmetry. The managing agents who already enjoyed enormous autonomy in their functioning were further buttressed through the grant of proxies by passive investors.<sup>74</sup> In all, managing agencies had limited financial investment in businesses, but obtained disproportionately high amount of control over the businesses, which not only made them powerful actors in the economy but also susceptible to abusing their powers.<sup>75</sup> That leads to the question as to what role the law played in regulating their conduct during the colonial period.

In the initial years of operation of the managing agency system, no legislative or regulatory fiat directly came in its way. This is an illustration of the inefficiencies caused by transplanted legislation unless that takes into consideration the prevailing local circumstances. Since the abuse of the managing agency system was predominantly a local Indian problem and did not capture the attention of lawmakers in England, the transplanted law paid short shrift to those problems, and did not offer any protection to shareholders of companies that were subjected to mismanagement under the managing agency system. It is also possible that due to the predominance of British firms as managing agents, the necessary political will was absent in India to rein them in.<sup>76</sup> It was only at the very end of the colonial era that the managing agency system received legislative recognition. The Companies (Amendment) Act, 1936, which was the first to make at least some departures from English corporate law,<sup>77</sup> took cognizance of the

<sup>73</sup> ROY, *supra* note 66, at 122.

<sup>74</sup> MISRA, *supra* note 70, at 6-7; Goswami, *supra* note 69, at 294.

<sup>75</sup> The problems that emanated from this managing agency system are viewed from the lens of corporate law and governance subsequently. *See infra* Part IIIC1.

<sup>76</sup> As Misra's work demonstrates, aspects of race and politics may have had an influential role to play in the persistence of the managing agency system untouched by regulation despite strong criticism by shareholders who were predominantly Indian businesspersons. MISRA, *supra* note 70, at 7-8.

<sup>77</sup> *See also supra* notes 44-45 and accompanying text.

abuses pertaining to the managing agency system, and sought to introduce some checks and balances by limiting the duration of the managing agency contract and also to permit the removal of the managing agent for cause.<sup>78</sup>

The managing agency system is characteristic of the legislative phenomenon that occurred in colonial India where legal transplants through legislative instruments failed to take into account local social and economic circumstances. This was exacerbated by the motive of transplants, which were indirectly aimed at preferring British interests to local interests. This phenomenon continued for nearly a century until some signs of change began emanating in 1936.

Having explored the phenomenon of transplants during the colonial period, it is now necessary to examine the implication of decolonization that occurred through India's independence from the British in 1947.

#### B. THE EFFECT OF DECOLONIZATION ON INDIAN CORPORATE LAW (1947-1960)

In this sub-part I consider whether India's independence had any significant effect on the evolution of its corporate law. For this purpose, I examine the developments around the first decade following independence, i.e. until the late 1950s. Any discussion of corporate law during this period must necessarily be set in the context of India's economic policies and political imperatives that held sway at the time. As I elaborate, despite a radical shift in economic policies of the Indian Government immediately following independence, it was not accompanied by any significant change in the legislative process for corporate law as the preexisting phenomenon of legal transplant from England continued unabated.

---

<sup>78</sup> Rosen, *supra* note 27, at 264.

### 1. Economic Policy Shift Following Independence

Upon decolonization, although the Indian Government obtained the freedom to determine its own economic policies, it had also inherited an economy that was riddled with poverty, low levels of life expectancy and high rates of illiteracy.<sup>79</sup> Economic policymaking became a challenging exercise given widespread distrust for a wholly capitalistic order following the colonial dispensation for centuries using *laissez faire* policies, which were believed to have impoverished Indian businesses and the local economy.<sup>80</sup> Even the preeminent policy makers of free India were divided as regards the appropriate economic policies to be adopted. Jawaharlal Nehru, who eventually became India's first Prime Minister, advocated the model of "Fabian socialism" which embraced principles of "state ownership, regulation, and control over key sectors of the economy in order to improve productivity and at the same time curb economic concentration."<sup>81</sup> Adopting a different view were certain members of his Congress party such as Vallabhbhai Patel, who became India's Home Minister, who argued for pursuing "liberal economic policies and incentives to private investment that were justified in terms of the sole criterion of achieving maximum increases in production."<sup>82</sup> The tensions arising through obviously opposing economic policies runs through the initial years of Indian independence.

In this background, the Indian government effectively pursued the policy for a "mixed economy," a fact that became evident with the first Industrial Policy Resolution of 1948.<sup>83</sup> While the importance of private capital was recognized and several Indian business groups continued to thrive during this era,<sup>84</sup> the bulk of the focus during this period was the direct participation of the state in the process of industrialization.

Certain capital-intensive industries were reserved for the government.<sup>85</sup> It was found that “these measures brought about a sea change in the nation’s business environment.”<sup>86</sup> Moreover, “[i]ndependent India did not abandon the free enterprise system altogether, but what these policies together sought to introduce was a system very different from the one that had operated under colonialism.”<sup>87</sup>

Even though the stated policy did not display any aversion towards private capital and entrepreneurialism, certain legislative measures introduced that effect. Principal among them was the enactment of the Industries (Development and Regulation) Act, 1952, under which industrial units, including private ones, were required to obtain licences from the Government before they were established and operated.<sup>88</sup> Licences were required even for expansion of capacity.<sup>89</sup> Relatedly, a wide network of legislation enacted in the years immediately following India’s independence introduced “an extensive system of quantitative controls over capital issues, industrial licensing, foreign exchange rationing, imports and exports and the prices and movement of foodgrains.”<sup>90</sup> Under this dispensation, government’s authority over private businesses was all-pervasive given that entrepreneurs had to obtain licences for almost every activity they carried out. This gave rise to “widespread rent-seeking”<sup>91</sup> resulting in

<sup>91</sup> Goswami, *supra* note 88, at 87.

the prevalence of the “licence Raj” that dominated the Indian business sphere for decades to come.<sup>92</sup>

It is in this economic and political context that I analyze the first legislative exercise in corporate law in post-colonial India, the enactment of the Companies Act, 1956, which also turned out to be the most enduring piece of corporate legislation in India.

## *2. The First Companies’ Legislation in Post-Colonial India*

In view of the economic and political tensions discussed in the previous sub-part, it would be reasonable to assume that the Companies Act, 1956 would mark a significant departure from corporate law in the colonial era. The economic compulsions of the socialist approach of India’s first democratically elected government ought to have driven corporate law in a different direction. Surprisingly, though, that was not the case. Post-colonial corporate lawmaking followed exactly the same path adopted over and over again during the colonial period, which was to indulge in yet another exercise of legal transplant from England, thereby smacking of colonial continuity. However, the transplant effort this time was not a mechanical exercise, but rather well thought-out.

The inspiration for a new companies’ legislation in post-colonial India arose from the appointment of the Company Law Amendment Committee in England (known as the Cohen Committee), which suggested far-reaching changes to the then applicable English company law,<sup>93</sup> whose recommendations resulted in the enactment of the English Companies Act of 1948. After some initial law reform efforts, the Indian Government appointed a committee under the chairmanship of C.H. Bhabha, which undertook an extensive exercise (including interviewing experts across the country) and submitted its

<sup>93</sup> *Report of the Committee on Company Law Amendment (Cohen Committee Report 1945)*, available at [http://www.takeovers.gov.au/content/resources/other\\_resources/cohen\\_committee.aspx](http://www.takeovers.gov.au/content/resources/other_resources/cohen_committee.aspx).

477-page report to the Government in March 1952.<sup>94</sup> The Government accepted most of the recommendations of the Bhabha Committee thereby enacting the Companies Act, 1956.

Both the Bhabha Committee Report as well as the Companies Act, 1956 are striking in many ways. Despite the momentous shift in India's destiny through decolonization, the reliance on English laws as the model for Indian corporate law was unaffected. The tenor of the Bhabha Committee Report is such that on every aspect of the law, it largely referred to the developments in English company law and considered whether that would be relevant to the Indian context or not. There was no intention whatsoever to frame an indigenous legislation that is apt to India's changed circumstances given the enormous shift in its economic policies. In order to obtain a better sense of the extent of reliance on English law, a review of the Bhabha Committee Report indicates approximately 148 references to the English Companies Act of 1948, adopting with approval 64 of its provisions, and modifying or rejecting only 21 provisions.<sup>95</sup> The faithful adherence to English law also meant a continuation of the colonial policy of *laissez-faire*, which stood at stark contrast not only to the broader economic mindset of the time but also to the other statutes that were being enacted contemporaneously.<sup>96</sup> It is somewhat hard to fathom the rationale for such a bewildering approach of the Indian Parliament.

At one level, it may be possible to attribute this development to inertia, and the inability to immediately break away from the colonial mindset.<sup>97</sup> However, that fails to explain the Government's enthusiasm to introduce socialistic legislation in related areas of the law, and to steer clear of a purely market-based approach.<sup>98</sup> Ultimately, it boils

---

<sup>94</sup> Bhabha Committee Report, *supra* note 29.

<sup>95</sup> Similarly, the Bhabha Committee Report makes several references to the Cohen Committee Report.

<sup>96</sup> *See supra* note 90.

<sup>97</sup> This phenomenon has been evident in other areas of the law, some even long past decolonization. *See e.g.*, De, *supra* note 12; Kalhan, *supra* note 12.

<sup>98</sup> *See supra* note 90.

down to the compromises that the Government had to make in its economic philosophy to incorporate both a socialist approach that grants a large role to the state in business, but at the same time preserving the importance of the private sector. As one study notes: “That the government had no intention to unduly curtail the freedom of the private sector was also reflected in the new Company Law enacted in 1956.”<sup>99</sup> Moreover, “the new policy enunciations did not offer much of an immediate threat to private enterprise, the socialist rhetorics notwithstanding. This was so because the private sector was left undisturbed in the areas in which it had been operating or in which it was likely to expand.”<sup>100</sup> Despite the path dependence demonstrated by corporate law and the retention of the free philosophy therein, businesses were nevertheless faced with governmental control, albeit through other legislation rather than corporate law.

The legislative outlook towards company law can be illustrated by the treatment meted towards managing agencies, which had become even more controversial with the advancing tide of economic nationalism in the country.<sup>101</sup> Although the Bhabha Committee recognized the dysfunctional nature of the managing agency system, it was hesitant to jettison it through legislation.<sup>102</sup> It saw “an advantage to continue to rely on the managing agency system”<sup>103</sup> as it “may yet prove to be a potent instrument for tapping the springs of private enterprise.”<sup>104</sup> The Committee however recommended the tightening up of several provisions of the Companies Act relating to managing agencies. This approach seems to have invited furor, as it “was immediately denounced by a broad spectrum of Indian political opinion.”<sup>105</sup> The matter was therefore reviewed by a Parliamentary committee that suggested further strengthening.<sup>106</sup> As an outcome of this process, the Companies Act, 1956 “included strict limitations on managing

<sup>106</sup> *Id.*

agency remuneration, a limit on the numbers of companies any one agency house could manage, and a ban on intercompany loans between companies within the same managing agency group.”<sup>107</sup> At no point during this process was there adequate legislative will to radically address the matter by eliminating the managing agency system altogether due to its mounting ill effects.

In all, although the Indian Parliament was presented with the opportunity following independence to radically alter the nature of company law, especially given the altering economic sentiment, it chose to adopt the path dependence approach and continue to rely on transplanted law from England. In other words, decolonization did not represent any break whatsoever from the past. But, change became evident, albeit gradually and incrementally, in the years to follow.

#### C. THE APOGEE OF SOCIALISM IN INDIAN CORPORATE LAW (1960-1991)

India’s corporate law began witnessing a departure from its colonial past only from the early part of the 1960s. The socialist ideology of the Government appears not to have taken effect immediately upon decolonization, but only in the years that followed.<sup>108</sup> The Companies Act, 1956 proved to be a dynamic legislation, and beginning the 1960s has undergone amendments nearly 30 times during its life.<sup>109</sup> Most of these amendments were based on recommendations of committees appointed by the Government from time to time.<sup>110</sup> During the first three decades of its operation, it was constantly infused with socialistic ideals.

One such move related to greater influence of the government in the operation of companies, a departure from the previous market-oriented light-touch regulation

<sup>110</sup> Vasudev, *supra* note 30, at 21. The amendments and committee reports are too numerous to be discussed in detail within the space available in a single paper.

ranging back from the colonial times. For example, provisions relating to audit and investigation of the affairs of companies by the government were strengthened.<sup>111</sup> The concept of “deemed public companies” was introduced to enhance the regulatory sphere over private companies.<sup>112</sup> Through this, private companies that had share capital or business turnover beyond specified limits were treated as if they were public companies and regulated as such. This signifies a departure from English law, which not only made a clear distinction between private and public companies, but also subjected private companies to limited regulation and conferring considerable freedom given they were treated as organizations akin to partnerships.<sup>113</sup> Moreover, during this period, the concept of “public interest” was widely infused into company law. For example, the Companies Act, 1956 was amended to provide that any scheme of compromise or arrangement (such as an amalgamation) would be permitted only if was not prejudicial to public interest,<sup>114</sup> and that shareholders were entitled to seek the oppression remedy if the affairs of the company were conducted in a manner prejudicial to public interest,<sup>115</sup> thereby riddling the company legislation with the prevailing socialist ideology.

Continuing with the ongoing illustration of the managing agency system,<sup>116</sup> it too was caught by the rising wave of socialism. Despite having survived the turmoil it attracted during the enactment of the Companies Act, 1956, its death knell was sounded at the end of the 1960s. By way of the Companies (Amendment) Act, 1969, the entire managing agency system was sought to be abolished, as it was found to have

<sup>115</sup> Companies Act, 1956, § 397(1), as amended by the Companies (Amendment) Act, 1963.

<sup>116</sup> *See supra* Part IIA4, and notes 101-107 and accompanying text.

concentrated power in the hands of a few.<sup>117</sup> This represents an important step in post-colonial India as it clearly separates an institution that was historically dominated by the British business houses, particularly in the colonial period.<sup>118</sup>

During this era, other statutes were enacted to supplement company law in further solidifying the socialist tendencies of the government. Two such statutes deserve a mention. The first is the Monopolies and Restrictive Trade Practices Act, 1969 (“MRTP Act”), which was intended to prevent the concentration of economic power. The other is the Foreign Exchange Regulation Act, 1973 by which the Government restricted foreign companies from holding more than 40 percent shares of Indian companies. In addition to the altering shape of company law, these statutes had the effect of curbing private enterprise.

These developments had an arguably negative impact on corporate governance. They led to the growth of certain business families and industrial groups (largely to the exclusion of others) that held large chunks of capital in even publicly listed companies. Finance was essentially available only through banking channels (as opposed to the capital markets). During this era, due to concentrated ownership of shares, the controlling shareholders, which were primarily business families or the state, continued to exert great influence over companies at the cost of minority shareholders.<sup>119</sup>

The legislative activity during this era was ably supported by innovation in judicial decision-making that stretched the contours of corporate law to fit within the

---

<sup>117</sup> DATTA, *supra* note 29, at 10. The final deadline for abolition was extended until 1970. MISRA, *supra* note 70, at 192.

<sup>118</sup> MISRA, *supra* note 70, at 192 (noting also that this was targeted to end “the old British managing agency houses and the socially exclusive business culture which they embodied”).

<sup>119</sup> Umakanth Varottil, *A Cautionary Tale of the Transplant Effect on Indian Corporate Governance*, 21 NAT. L. SCH. IND. REV. 1, 6 (2009).

“socialist” theme underlying the times.<sup>120</sup> In a significant ruling, the Supreme Court of India observed:

The traditional view of a company was that it was a convenient mechanical device for carrying on trade and industry, a mere legal frame work providing a convenient institutional container for holding and using the powers of company management. ... This doctrine glorified the concept of a free economic society in which State intervention in social and economic matters was kept at the lowest possible level. But gradually this doctrine was eroded by the emergence of new social values which recognised the role of the State as an active participant in the social and economic life of the citizen in order to bring about general welfare and common good of the community. ... The adoption of the socialistic pattern of society as the ultimate goal of the country’s economic and social policies hastened the emergence of this new concept of the corporation. ... But, one thing is certain that the old nineteenth century view which regarded a company merely as a legal device adopted by shareholders for carrying on trade or business as proprietors has been discarded and a company is now looked upon as a socio-economic institution wielding economic power and influencing the life of the people.<sup>121</sup>

In interpreting the provisions of the Companies Act, the Supreme Court was willing to depart from the provisions of parallel English law, where the circumstances so warranted, thereby requiring it to “shake off the inhibiting legacy of its colonial past and assume a dynamic role in the process of social transformation.”<sup>122</sup>

---

<sup>120</sup> Furthermore, the Constitution was amended to include the word “socialist” in the Preamble, which now provides that India is a “Sovereign Socialist Secular Democratic Republic.” Constitution (Forty-second Amendment) Act, 1976, § 2.

<sup>121</sup> *National Textile Workers’ Union v. P.R. Ramakrishnan*, AIR 1983 SC 75, ¶ 4 (per P.N. Bhagwati, J.).

<sup>122</sup> *Id.* at § 9. See also *Hind Overseas Pvt. Ltd. v. R. P. Jhunjhunwala*, AIR 1976 SC 565, at ¶ 31 (observing: “... it is more apposite now that the background, conditions and circumstances of the Indian society, the needs and requirements of our country call for a somewhat different treatment”); VEPA SARATHI, INTERPRETATION OF STATUTES 454-55 (2003); RAMAIYA, *supra* note 109, at 15-16.

During this era, the legislative measures in corporate law coupled with activist interpretation by the judiciary brought about a sea change regarding the manner in which companies were viewed. What was essentially a private business organization took on public overtones with much broader societal implications being recognized and popularized in India.<sup>123</sup>

The socialist era came under severe strain towards the late 1980s<sup>124</sup> and a precipice was reached in 1990 when India's foreign exchange reserves depleted to alarmingly low levels.<sup>125</sup> In 1991, the Government then in power was forced to abandon the socialist principles and embark upon a process of economic liberalization, which once again altered India's economic course significantly. This also had a cascading effect on the destiny of Indian corporate law thereafter.

#### D. CORPORATE LAW FOLLOWING INDIA'S ECONOMIC LIBERALIZATION (1991-2013)

In 1991, the Government introduced a string of policy measures to address the prevailing economic situation. By way of economic liberalization, they were intended to boost business activity and foreign investment in India. These measures included the reduction of industrial licensing only to a small range of industries, permitting companies to freely issue capital without any restrictions, and gradually opening up various sectors for foreign investment.<sup>126</sup> This new economic outlook naturally triggered a slew of changes to corporate law in India, which operated on different fronts, including (i) amendments to the Companies Act, 1956, (ii) introduction of securities legislation to promote the stock markets, and (iii) adoption of specific measures to

---

<sup>124</sup> India's socialist policies has also been the subject matter of strident criticism by several economists. *See e.g.* JAGDISH N. BHAGWATI, *INDIA IN TRANSITION* (1993); ARVIND PANAGARIYA, *INDIA: THE EMERGING GIANT* (2008).

<sup>125</sup> Kumar, *supra* note 79, at 8.

<sup>126</sup> *Id.*

enhance corporate governance. I examine the impact of each of these efforts separately.

### 1. Amendments to the Companies Act, 1956

During the liberalization period, the key changes were the flexibility introduced to companies to raise as well as to restructure capital. This was intended to enable Indian companies to attract investments, particularly from foreign investors. For example, Indian companies were allowed to issue shares with differential rights as to dividend and voting.<sup>127</sup> Similarly, concepts such as employee stock option and sweat equity that were by then common in the U.S. now received statutory recognition in India.<sup>128</sup> A capital maintenance regime that had previously been extremely stringent was relaxed to permit companies to buy back their own securities.<sup>129</sup> These measures had the effect of transitioning this area of Indian corporate law more towards laws from other jurisdictions (e.g. Delaware law),<sup>130</sup> with less emphasis or cross-referencing to the English provisions.<sup>131</sup>

Consistent with the introduction of greater flexibility, legislative reforms of corporate law during this period also sought to reverse the effects of the previous socialist tendencies. For instance, in the year 2000 the concept of “deemed public companies” was deleted,<sup>132</sup> thereby reverting to the previous scenario where only two types of companies exist, i.e. private and public.<sup>133</sup> Similarly, the rigors of the MRTTP Act were eased through its amendment, which did away with the concept of pre-merger

---

<sup>130</sup> Vasudev, *supra* note 30, at 21.

<sup>131</sup> This transition is discussed in greater detail later. *See infra* Part III.

<sup>132</sup> Companies (Amendment) Act, 2000.

<sup>133</sup> At the same time, the situation was far from being streamlined with the English parallel. For instance, now subsidiaries of private companies were automatically treated as public companies (and subjected to more extensive regulation). This situation continues to date.

notification. During that regime, mergers and takeovers were effectively permitted without any antitrust law whatsoever.<sup>134</sup>

## 2. Reforms in Securities Regulation

Prior to 1992, India followed the merit-based regulation of securities offerings.<sup>135</sup> Companies intending to offer securities to the public were required to obtain the approval of the Controller of Capital Issues, a government body, which would specifically approve each public offering and its terms, including the price at which shares were to be offered.<sup>136</sup> Due to the extensive governmental oversight that intensified during socialist era and the resultant excessive stringency in accessing the capital markets, public offering of shares by Indian companies was not that prevalent.

The establishment of India's securities regulator, the Securities and Exchange Board of India ("SEBI") was a watershed event in India's corporate and securities sphere. SEBI's foray not only led to more of a disclosure-based regulation of public offerings of securities by Indian companies,<sup>137</sup> but its role was also focused on promoting India's capital markets in general. This enabled companies since the mid-to-late 1990s to raise billions of dollars in capital through public offering of shares and accompanied listings. These factors triggered a dramatic shift in the Indian capital markets.

---

<sup>134</sup> Although a new Competition Act, 2002 was enacted during the liberalization era to rein in mergers and acquisitions and reintroduce pre-merger notifications, that law did not take effect in regulating combinations until 2011.

<sup>135</sup> Merit regulation involves a review by a securities regulator of the quality and suitability of the offering of securities by a company within the jurisdiction of the regulator. See Ronald J. Colombo, *Merit Regulation Via the Suitability Rules*, 12 J. INT'L. BUS. & L. 1, 7 (2013).

<sup>136</sup> G. Sabarinathan, *Securities and Exchange Board of India and the Indian Capital Markets – A Survey of the Regulatory Provisions*, IIM BANGALORE RESEARCH PAPER NO. 228, available at <http://ssrn.com/abstract=2152909>, at 10-11. The Controller of Capital Issues was established under the Capital Issues Control Act, 1947. See *supra* note 90 and accompanying text.

<sup>137</sup> Upon the establishment of SEBI, the office of the Controller of Capital Issues was abolished. PANAGARIYA, *supra* note 124, at 242.

In the two decades that followed its establishment, SEBI has promulgated a number of regulations that affect almost every segment of the capital markets. It also acquired powers under the Companies Act, 1956 to regulate matters pertaining to the issue and transfer of securities by listed companies or those that are proposing to embark upon a listing of their securities.<sup>138</sup> In that sense, the regulatory domain over public listed companies was transitioned from the Central Government under the Companies Act, 1956 to an independent market regulator in the form of SEBI that it exercised through a combination of various corporate and securities laws.

SEBI's entry into the corporate law domain signifies an important step in breaking the linkages that India had with its colonial past. To a large extent, the U.S. Securities Exchange Commission ("SEC") has inspired SEBI's mandate as well as its role and functioning.<sup>139</sup> As far as securities regulation is concerned, there seems to be very little reference to the U.K. model suggesting that the Indian Government had been keen to adopt the U.S. model as a reference point, if at all, while reviewing its own securities regulation. For instance, a substantial part of the jurisprudence relating to insider trading has closely tracked that of the U.S.<sup>140</sup> In all, while SEBI's entry into the Indian regulatory scene marks an important milestone in the evolution of Indian corporate law, it also signifies a further departure not only from the colonial past but the reluctance to rely upon the U.K. model as far as securities regulation is concerned.

### 3. Corporate Governance Measures

In the 1990s, SEBI rapidly began ushering in corporate governance reforms as well as a measure to attract foreign investment. Curiously, the first corporate governance initiative was sponsored by industry. In 1998, a National Task force constituted by the Confederation of Indian Industry (“CII”) recommended a code for “Desirable Corporate Governance,” which was voluntarily adopted by a few companies.<sup>141</sup> Here, we witness the re-emergence of the English developments as an influencing factor because the CII Code was largely based on the Cadbury Committee report issued in the U.K.<sup>142</sup>

Thereafter, a committee chaired by Mr. Kumar Mangalam Birla submitted a report to SEBI “to promote and raise the standard of Corporate Governance in respect of listed companies.”<sup>143</sup> Based on the recommendations of the Kumar Mangalam Birla committee, the new Clause 49 containing norms for corporate governance was inserted in 2000 into the Listing Agreement that was applicable to all listed companies of a certain size.<sup>144</sup> Although the substance of the corporate governance norms contained in Clause 49 were similar to those recommended in the U.K. by the Cadbury Committee Report and which subsequently found their place in the Combined Code on Corporate Governance,<sup>145</sup> there was one material difference. While the Combined Code operated

---

<sup>141</sup> Confederation of Indian Industry, *Desirable Corporate Governance: A Code* (Apr. 1998) available at [http://www.acga-asia.org/public/files/CII\\_Code\\_1998.pdf](http://www.acga-asia.org/public/files/CII_Code_1998.pdf) (“CII Code”). The CII Code, which was directed at large companies, contained some of the measures that continue to date, such as the appointment of a minimum number of non-executive independent directors, an independent audit committee, the unimpeded flow of key information to the board of directors and norms for corporate disclosures to shareholders.

<sup>142</sup> U.K., Financial Reporting Council, *Report of the Committee on the Financial Aspects of Corporate Governance* (1992), available at <http://www.ecgi.org/codes/documents/cadbury.pdf>.

<sup>143</sup> See Securities and Exchange Board of India, Report of the Kumar Mangalam Birla Committee on Corporate Governance (Feb. 2000), available at <http://www.sebi.gov.in/commreport/corpgov.html>.

<sup>144</sup> Securities and Exchange Board of India, SMDRP/POLICY/CIR-10/2000 dated Feb. 21, 2000, available at <http://www.sebi.gov.in/circulars/2000/CIR102000.html>. Clause 49 contained a schedule of implementation whereby it was applicable at the outset to large companies and newly listed companies, and thereafter to smaller companies over a defined timeframe.

<sup>145</sup> The Combined Code has since been renamed the “UK Corporate Governance Code”. See, U.K., Financial Reporting Council, *The UK Corporate Governance Code* (Sep. 2014).

as voluntary code on a “comply-or-explain” basis,<sup>146</sup> Clause 49 was mandated for large listed companies. Hence, there was explicit recognition that what works in the U.K. will not necessarily work in India due to the various institutional circumstances and other local factors.<sup>147</sup>

Thereafter, following Enron and other global corporate governance scandals that occurred at the turn of the century, SEBI decided to strengthen Indian corporate governance norms. In the wake of the enactment of the Sarbanes-Oxley Act (“SOX”) in the U.S. in 2002, SEBI appointed the Narayana Murthy Committee to examine Clause 49 and recommend changes to the existing regime.<sup>148</sup> Following the recommendations of the Narayana Murthy Committee, SEBI, on October 29, 2004, issued a revised version of Clause 49, which came into effect from January 1, 2006. Thus, we see that although there was some reference to the English position under the Cadbury Committee report during the initial stages of formulation of corporate governance norms in India, these norms have subsequently been strongly influenced by developments in the U.S. The corporate governance reforms during this era can at best be said to operate as a mixed transplant from both the U.S. and the U.K.

---

<sup>146</sup> Other former British colonies such as Australia, Canada and Singapore too have adopted voluntary codes similar to the U.K. See Anita Indira Anand, *An Analysis of Enabling vs. Mandatory Corporate Governance: Structures Post-Sarbanes Oxley*, 31 DEL. J. CORP. L. 229, 229 (2006); TAN LAY HONG, TAN CHONG HUAT & LONG HSUEH CHING, *CORPORATE GOVERNANCE OF LISTED COMPANIES IN SINGAPORE* (2006). Furthermore, for European jurisdictions, see Eddy Wymeersch, *Enforcement of Corporate Governance Codes* (2005), available at <http://ssrn.com/abstract=759364>.

<sup>147</sup> The Kumar Mangalam Committee report built upon the pattern established by the CII Code and recommended that “under Indian conditions a statutory rather than voluntary code would be far more purposive and meaningful, at least in respect of essential features of corporate governance.” *Id.*, at ¶ 1.7. For a detailed discussion regarding the transition from the CII Code to the Kumar Mangalam Birla Committee Report, see Bernard S. Black and Vikramaditya S. Khanna, *Can Corporate Governance Reforms Increase Firms’ Market Values? Evidence from India*, 4 J. Emp. Legal. Stud. 749 (2007).

<sup>148</sup> Securities and Exchange Board of India, Report of the SEBI Committee on Corporate Governance (Feb. 2003), available at <http://www.sebi.gov.in/commreport/corpgov.pdf>. The need for a review of Clause 49 was in part triggered by events that occurred in the U.S. at the turn of the century, such as the collapse of Enron and WorldCom. See *id.* at para. 1.6.1. Considerable emphasis was placed in this report on financial disclosures, financial literacy of audit committee members as well as on chief executive officer (CEO) and chief financial officer (CFO) certification, all of which are matters similar to those dealt with by SOX.

In sum, during the liberalization era, we see a strong shift from the pre-existing socialistic disposition towards a more open market-oriented approach, albeit gradually. While there are some indications of continued guidance from India's former colonizer, this era has been marked by the stronger influence of the U.S. on all fronts, including corporate finance, securities regulation and corporate governance.

During the liberalization phase, considerable efforts were also made to review the provisions of the Companies Act, 1956 given that it had undergone significant change over the years and had possibly outlived its relevance and utility. There were calls for a new companies' legislation. After nearly two decades of debate, the new Companies Act, 2013 was enacted that ushered in an entirely new era in Indian corporate law.

#### E. CURRENT STATE OF PLAY: THE COMPANIES ACT, 2013

In this sub-part, I discuss some of the policy imperatives and tensions that were prevalent during the elongated process of enacting the Companies Act, 2013. It is essential to analyze the factors that were at play behind the scenes for the new legislation in order to determine whether it breaks further away from India's colonial past as well as the current trajectory of English company law. As I argue, the new legislation marks a further departure away from English law.<sup>149</sup> While the liberalization phase that began in 1991 attempted to break away from the shackles of the previous socialist approach of company law, the new legislation bucks that trend and reinforces some of the social aspects of corporate law, but in a subtler and more nuanced fashion.

Since the early 1990s, efforts had been underway to revamp the companies' legislation in India due to the difficulties encountered in the implementation of the

---

<sup>149</sup> While I deal with some of the broader political and economic factors at play in the lawmaking process in this subpart, I analyze some of the more substantive provisions in detail subsequently. *See infra* Part III.

Companies Act, 1956, which had to be amended. Although several proposals were made and Bills drafted and presented in Parliament over the last two decades (specifically in 1993, 1997 and 2003),<sup>150</sup> it was the appointment of an Expert Committee on Company Law in 2004 under the chairmanship of Mr. J.J. Irani (“Irani Committee”) that triggered the shaping of the current legislation. The Irani Committee issued a concept paper based on which it conducted a public consultation, following which it issued its report for drafting a new legislation.<sup>151</sup> The report suggested a simplification of the law, and was indeed business friendly, but at the same time subscribed to stringent norms of corporate governance.<sup>152</sup> Based on the recommendations of the Irani Committee, the Companies Bill, 2008 was presented in Parliament, which lapsed.<sup>153</sup>

In the interim, corporate India was rocked by a massive corporate governance scandal involving Satyam Computers. In January 2009, the chairman of the company confessed to fraud to the magnitude of over US\$ 1 billion.<sup>154</sup> This triggered renewed calls for strengthening corporate law and governance norms in India. Intriguingly, however, when the Companies Bill, 2009 was presented in Parliament, it contained no changes whatsoever from its previous incarnation in 2008.

The Companies Bill, 2009 was referred to the Parliamentary Standing Committee on Finance under the chairmanship of Mr. Yashwant Sinha. The Standing Committee

<sup>154</sup> Letter from B. Ramalinga Raju, Chairman, Satyam Computer Services Ltd., to the Board of Directors, Satyam Computer Services Ltd. (Jan. 7, 2009), available at <http://www.hindu.com/nic/satyam-chairman-statement.pdf>. See also Heather Timmons and Bettina Wassener, *Satyam Chief Admits Huge Fraud*, *N.Y. TIMES*, Jan. 8, 2009, <http://www.nytimes.com/2009/01/08/business/worldbusiness/08satyam.html>. This scandal has often drawn parallels with that of Enron. See Vikramaditya Khanna, *Corporate Governance in India: Past, Present and Future?*, 1 JINDAL GLOB. L.R. 171, 188-89 (2009).

reviewed the Bill and issued its report in 2010.<sup>155</sup> Although the Companies Bill, 2009 appeared to turn a blind eye to the fateful occurrences of scandals that rocked corporate India, the Standing Committee undid the effects of those deficiencies by recommending detailed provisions in corporate law to prevent such failures in the future. Specific among the Standing Committee's recommendations were heightened standards of corporate governance and measures to rein in company managements and impose higher standards on gatekeepers such as independent directors and auditors. Another set of measures introduced by the Standing Committee is of immense significance as it redefined the role of the corporation in the Indian context. While the Companies Bill, 2009 was shareholder-oriented, in that directors owed duties to carry on the business of the company "for the benefit of its members as a whole",<sup>156</sup> the Standing Committee insisted on a broader stakeholder approach to corporate law, insisting that directors have a duty "to promote the objects of the company in the best interests of its employees, the community and the environment as well."<sup>157</sup> Most significantly, a concomitant concept was the introduction of a corporate social responsibility ("CSR") provision requiring a mandatory spending by large companies towards social causes.<sup>158</sup> Based on the Standing Committee Report, the Government introduced the Companies Bill, 2011 in Parliament, which naturally contained significant changes from the Companies Bill, 2009. The 2011 Bill was referred back to the Standing Committee for review of the revised provisions, particularly because it contained significant changes from the previous version. The Standing Committee issued another report,<sup>159</sup> following which the Companies Act, 2013 was passed by both Houses of Parliament and received the assent of the President of India on August 31, 2013. This

legislation is being brought into force in stages, with several of its key provisions having already been notified.<sup>160</sup>

At this juncture, it would be useful to consider some of the policy issues underlying the enactment of the Companies Act, 2013. In all, while the Companies Bill, 2009 (and its identical predecessor of 2008) was based on the Irani Committee recommendations, which were business friendly in nature, the result of its review by the Standing Committee transformed it into a document with radically different philosophical overtones that emphasized on stricter controls through regulation and also emphasized the social responsibility of corporations. These philosophical pressures are quite evident. It is clear that the Irani Committee was concerned with attracting greater investment and providing a simple and clear regime for businesses.<sup>161</sup> However, the Standing Committee approached the legislative process from a completely different perspective. Significantly, it was operating in the shadow of a corporate scandal that evoked outrage within the country, particularly against the corporate sector and the business community.<sup>162</sup> That might perhaps explain the Standing Committee's insistence on a stakeholder approach that encompasses constituencies such as the employees,

---

<sup>160</sup> For a list of the provisions that have already taken effect, see Ministry of Corporate Affairs, Government of India, *Table containing provisions of Companies Act as notified up to date and corresponding provisions thereof under Companies Act, 1956*, available at [http://www.mca.gov.in/Ministry/pdf/ProvisionsTable\\_CompAct.pdf](http://www.mca.gov.in/Ministry/pdf/ProvisionsTable_CompAct.pdf). The entire legislation is expected to become effective progressively once the Government of India notifies the relevant rules under the legislation. Until then, the previous legislation, the Companies Act, 1956 will continue to be in force on such matters.

<sup>161</sup> That is understandable given that the committee was chaired by an industrialist representing a leading industrial conglomerate in India, the Tata Group. See At 75, *J.J. Irani bids adieu to Tata Steel*, The Hindu Business Line (Jun. 6, 2011); Christabelle Noronha & Cynthia Rodrigues, *A different life: Dr. JJ Irani reminisces about life and times in Jamshedpur* (Aug. 2007), available at <http://www.tata.com/careers/articlesinside/Cj0IJRfNjr0=/TLYVr3YPkMU=>. Moreover, the membership of the Irani Committee was rather broad based. As its report noted: "The Expert Committee consists of 13 members and 6 special invitees drawn from various disciplines and fields including trade and industry, chambers of commerce, professional institutes, representatives of Banks and Financial Institutions, Sr. Advocates etc." Expert Committee on Company Law, *supra* note 151, at ¶ 8.

<sup>162</sup> The Satyam scandal had to some extent sullied the image of the crucial Indian information technology (IT) industry and also posed a threat to the future of its stakeholders such as employees, customers and creditors. See *NASSCOM Announces Formation of Corporate Governance and Ethics Committee*, BUSINESS STANDARD (India), Feb. 11, 2009.

customers and the environment as beneficiaries within the corporate law sphere rather than merely shareholders as has been the approach in several developed jurisdictions. In the wake of these scandals, a lukewarm response by the political class would be met with an element of scorn. It may also be seen as a counteraction by the political class to curb the influence of the business sector and to impose adequate checks and balances through corporate law.<sup>163</sup> It is a confluence of these factors that led to a compromise that is evident in the Companies Act, 2013 and a number of its specific provisions.

This discussion, without doubt, indicates that the present shape of corporate law is the result of local issues and concerns, and is shorn of any influence by the colonial past or its legal regime. During the law reform process that lasted nearly two decades before culminating in the Companies Act, 2013, there was almost no reference whatsoever to English company law. This stands at stark contrast to the process for the enactment of the Companies Act, 1956, which was essentially a transplant of the English Companies Act of 1948.<sup>164</sup> Neither the Irani Committee nor the Parliamentary Standing Committee on Finance (on both occasions in 2010 and 2012) made any significant references whatsoever to the prevailing English position in company law.<sup>165</sup> This despite English corporate law having made giant strides in its evolution since India's decolonization with the Companies Act of 1985 and the more recent Companies Act of 2006. The present English position has been the subject matter of extensive consultation,<sup>166</sup> most of which has been closely followed<sup>166</sup> by other former British colonies.<sup>167</sup> But, Indian lawmakers chose to ignore those completely.

---

<sup>163</sup> Another factor would be to note the composition of the Standing Committee, which essentially consisted of Members of Parliament, unlike the Irani Committee that displayed a wider representation. Moreover, the Standing Committee was chaired by Mr. Yashwant Sinha, a senior member of the Bharatiya Janata Party (BJP), which was at the time in the opposition. These factors may have had an invisible role to play in the tenor of the Standing Committee's recommendations.

<sup>164</sup> For a detailed discussion, *see supra* Part IIB2.

<sup>165</sup> Compare this with the extensive cross-referencing during the process for enacting the Companies Act, 1956. *See supra* note 95 and accompanying text.

<sup>166</sup> The English Companies Act of 2006 was enacted following a series of lengthy consultations that included a review and a white paper. DTI, *Company Law Reform: Modern Company Law Reform for a Competitive Economy* (1998); DTI, *Company Law Reform*, Cm. 6456 (Mar. 2005). The series of documents that formed the basis of the legislation are available at <http://webarchive.nationalarchives.gov.uk/20121029131934/http://www.bis.gov.uk/policies/business->

Although there is no evidence of explicit resistance from the Indian lawmaking process in embarking on the colonial and the initial post-colonial approach of transplanting English law into India, the focus of the current process was entirely inward looking in attempting to locate solutions for problems that are specific to India. In other words, the solutions proposed were entirely autochthonous, thereby signifying a fundamental change from the previous attitude of Indian legislation.

In concluding this Part, it is evident that the rather lengthy historical narrative regarding the evolution of Indian corporate law was necessitated for a number of reasons. First, the literature regarding the historical analysis of companies' legislation in India is sparse, especially over several time horizons. Such a narrative would fill a gap in the literature and also aid in the understanding of the various factors that were in play at different points in time so as to explain the status of some of the present legislative provisions. Second, and more immediately for the purposes of this paper, the historical explanation supports the core thesis that what began as a continual process of transplantation in the colonial era and in the period immediately following India's decolonization subsequently converted itself into an introspective process (with some experiences derived from other jurisdictions such as the U.K. and the U.S.), but without wholesale adoption of English law as was hitherto the case. Finally, to be sure, it is not my case that the Companies Act, 2013 or the preceding legislation during India's socialist era were entirely different from parallel English legislation. Of course, several provisions of the Companies Act, 1956 (which were transplanted from the English Companies Act of 1948) continue to find their place in some form or the other under the present law. This might be the result of the attitude represented by the saying "if it ain't broke, don't fix it".<sup>167</sup> But, rather than provisions which have been left untouched, what

law/company-and-partnership-law/company-law/publications-archive. For a discussion of the legislative process, see PAUL L. DAVIES, GOWER AND DAVIES PRINCIPLES OF MODERN COMPANY LAW 55-57 (2008).

<sup>167</sup> For Singapore, see *Report of the Company Legislation and Regulatory Framework Committee* (Oct. 2002), available at <https://www.acra.gov.sg/uploadedFiles/Content/Legislation/FinalReport1.pdf>.

<sup>168</sup> To that extent, there is support for the "legal families" or "legal origins" theories.

is of greater importance to my analysis is the areas of law where specific changes have been proposed from time to time and those that have required policy-oriented discourses. It is in these areas where, the reference point that was previously on England has either moved to other jurisdictions such as the U.S. or has simply moved inwards in the search of an indigenous solution to solve problems that are unique to the Indian context. That is what establishes the visible shift from transplant to autochthony.<sup>169</sup>

### III. COMPARATIVE ANALYSIS OF CORPORATE LAW: IMPACT OF DECOLONIZATION

In this Part, I analyze the principal concepts under Indian corporate law and compare (or contrast) them with parallel provisions under English law. This comparison adopts two approaches. One is to consider how Indian law has evolved across various key topics since decolonization and in comparison with laws transplanted from England during the colonial period. The other is to compare Indian corporate law with the developments in parallel English legislation since India's decolonization and to examine how (and why) the two countries have adopted somewhat different trajectories despite their shared common law heritage.

I undertake this comparison of substantive legal concepts through four broad concepts, viz. (i) corporate structure and personality, (ii) corporate finance and capital structuring, (iii) corporate governance, and (iv) corporate law enforcement machinery.<sup>170</sup>

---

<sup>169</sup> To that extent, merely because countries may share the same legal heritage, it does not automatically result in similarities in specific legislation such as corporate law.

<sup>170</sup> While it would be impossible to deal with all these topics with equal weight within the course of this paper, greater emphasis will be placed on corporate governance as that is a core (and usually contentious) aspect of corporate law.

## A. CORPORATE PERSONALITY AND STRUCTURE

When it comes to corporate personality and structure, the corporate law in India is strict and somewhat inflexible, and continues to carry some of the rigors of its colonial past, which have been buttressed further by measures introduced in the post-colonial era. On the other hand, England has progressively eased various structural impediments that have made it far more straightforward for companies to be incorporated and structured. To that extent, Indian corporate law has moved in a direction that is very different from the path adopted by its former colonizer. I seek to support my assertion through some illustrations.

Corporate law stipulates that a company that has been incorporated in accordance with the law is a legal personality that is separate from its shareholders, directors, creditors and other constituencies.<sup>171</sup> This principle forms the foundation of the limited liability protection offered to shareholders that encourages entrepreneurs to establish business and carry out trade that benefits the economy as a whole.<sup>172</sup> However, the law pertaining to “piercing the corporate veil” steps in to create a balance whereby the limited liability doctrine is not abused to adversely affect the interests of third parties (particularly creditors).<sup>173</sup> My comparison suggests that English law is rather circumspect about the idea of piercing the corporate veil, thereby treating the principles of separately legal personality and limited liability as sacrosanct.<sup>174</sup> More recent evidence from the English courts considerably narrow the situations where the veil can be pierced.<sup>175</sup> Contrast this with the position in India where courts have been more liberal in piercing the veil.<sup>176</sup> The differing treatments are indicative of the

---

<sup>171</sup> See Companies Act, 2013, § 9.

<sup>172</sup> Frank H. Easterbrook & Daniel R. Fischel, *Limited Liability and the Corporation*, 52 U. Chi. L. Rev. 89 (1985).

<sup>173</sup> Henry Hansmann & Reinier Kraakman, *Towards Unlimited Shareholder Liability for Corporate Torts*, 100 YALE L.J. 1879 (1991).

<sup>174</sup> The principle of limited liability was first established in the landmark case of *Salomon v. Salomon*, [1897] AC 22. See also *Adams v. Cape Industries plc*, [1991] 1 All ER 929.

<sup>175</sup> *Prest v. Petrodel Resources Ltd*, [2013] UKSC 34.

<sup>176</sup> The attitude of the Indian courts in piercing the veil is set forth below:

variance in the philosophy, whereby England continues to follow a market-oriented approach wherein incorporation is considered a facilitative process for advancing the business needs of entrepreneurs, whereas the courts in India tend to adopt a broader view taking into account the interests of all stakeholders whose interests are affected by the actions of companies.<sup>177</sup>

One of the colonial-era requirements under Indian law obliges companies to include in their memorandum of association<sup>178</sup> the objects for which they are incorporated. This gives rise to the doctrine of *ultra vires* whereby a business activity carried out by the company which is beyond its stated objects is considered void for exceeding the company's capacity.<sup>179</sup> Over the years, this doctrine has caused some level of consternation in countries that have adopted English law.<sup>180</sup> Therefore, both England<sup>181</sup> as well as some of its former colonies<sup>182</sup> have done away with the requirement that companies must have objects clauses in their memorandum of association. Consequently, the *ultra vires* doctrine has been effectively abolished in these jurisdictions. Despite the liberalization of this rule in the light of the evolving

---

The horizon of the doctrine of lifting of the corporate veil is expanding. It can be lifted even at the invitation of the company itself. Contemporary trend shows that the lifting of the corporate veil is permissible whenever public interest so demands. The courts have been pragmatic in their approach in unveiling companies, especially the subsidiary companies to see their real face in the interests of justice. The modern tendency is, where there is identity and community of interest between companies in the group, especially where they are related as holding company and wholly owned subsidiary or subsidiaries, to ignore their separate legal entity and look instead at the economic entity of the whole group tearing of the corporate veil. [footnotes omitted]

DATTA, *supra* note 29, at 176. *See also* Ritu Birla, *Maine (and Weber) Against the Grain: Towards a Postcolonial Genealogy of the Corporate Person*, 40 J. L. & SOC'Y 92 (2013) (finding that on corporate veil piercing India has adopted a different trajectory from the Western markets).

<sup>177</sup> This is consistent with the broader "socialistic" approach adopted by the Indian courts generally in corporate law. *See supra* notes 120-122 and accompanying text.

<sup>178</sup> The constitutional documents of a company (both in England and India) consist of the memorandum of association and the articles of association.

<sup>179</sup> This doctrine was established in a leading case of *Ashbury Railway Carriage & Iron Co. Ltd. v. Riche*, (1875) LR 7 HL 653.

<sup>180</sup> For instance, one method adopted to overcome this strict prohibition was to follow a "kitchen sink" approach by drafting elaborate objects clauses in the constitutional documents to include any business activity that can possibly be envisaged.

<sup>181</sup> Davies, *supra* note 166, at 153-54. *See also* U.K. Companies Act, 2006, § 31(1) (providing that a company's objects are unrestricted unless otherwise specified).

<sup>182</sup> For Singapore, *see* TAN CHENG HAN (ED.), WALTER WOON ON COMPANY LAW 113 (2009).

business environment, India has remained unwavering in its faithfulness to the *ultra vires* rule. Even the Companies Act, 2013 mandates that Indian companies must carry in their memorandum of association objects clauses specifying the type of business activity that they are permitted to carry on.<sup>183</sup> India has therefore opted to display some level of rigidity on this count despite reforms implemented in other “common law” jurisdictions.<sup>184</sup>

Similarly, on several matters regarding the corporate structure, corporate law in India is far stringent not only in comparison with its colonial past, but more so with reference to contemporary English corporate law. While English law clearly bifurcates the extent of regulation between private companies (small, closely-held and hence light regulation) and public companies (large, widely-held and hence more extensive regulation), this distinction is far less clear in India, whose regulatory philosophy tends to be rather overarching. Under current English law, the incorporators possess adequate choice to determine whether to go for a private company or a public one.<sup>185</sup> The philosophy of Indian corporate law is quite the opposite. Under the Companies Act, 2013, a private company that is the subsidiary of a public company is treated for all intents and purposes as if it is a public company.<sup>186</sup> By this, the state is not only arrogating to itself from the incorporators the choice of corporate form (that is otherwise available to them in other Western jurisdictions), but it also has the effect of enhancing the scope of regulation because several private companies incorporated as such are subjected to extensive regulation if they are subsidiaries of public companies. This demonstrates the philosophy of the Indian state to exercise broader control over

---

<sup>183</sup> Companies Act, 2013, § 4(1)(c).

<sup>184</sup> The U.S. too has granted considerable freedom to companies to carry on their business and has paid scant regard to the *ultra vires* doctrine. Stephen J. Leacock, *The Rise and Fall of the Ultra Vires Doctrine in United States, United Kingdom, and Commonwealth Caribbean Corporate Common Law: A Triumph of Experience Over Logic*, 5 DePaul Bus. & Com. L.J. 67 (2006).

<sup>185</sup> DAVIES, *supra* note 166, at 15. The philosophy behind this approach is to “think small first” and to avoid the application of regulation to private companies that were written for public companies. DTI, *Company Law Reform*, Cm. 6456, *supra* note 166, at ch. 4.

<sup>186</sup> Companies Act, 2013, § 2(71), proviso.

the corporate sector, although it arguably has the effect of inducing greater transparency that may benefit various stakeholders.

Other measures in Indian legislation that have crept in over the years represent a rather interventionist approach of the state compared to the market-oriented approach of the colonial period. For example, Indian corporate law places undue restraints on the establishment and operation of corporate groups, although they are quite common in India.<sup>187</sup> The Companies Act, 2013 confers powers on the Government to prescribe the number of layers of subsidiaries that a specific class of company may have.<sup>188</sup> Moreover, a company cannot make investments through more than two layers of investment companies.<sup>189</sup> Although there can be no case against the need for restricting the abuse of group company structures, the present stance arguably goes too far. It is unusual for jurisdictions to impose such absolute curbs on the use of investment vehicles and this provision appears somewhat unusual in the international context. This requirement appears to have emanated from specific episodes witnessed in India in the past, in this case the stock market scam involving the use of investment vehicles for routing funds back and forth from companies and their controlling shareholders, which was the subject matter of a Joint Parliamentary Committee report over a decade ago.<sup>190</sup> Although such a legislative response ensnares specific abuses of corporate group structures, it also has the unintended effect of capturing genuine business transactions and structures thereby curbing the ability of companies to organize more efficiently. While the general method utilized in other countries to prevent abuse is to invoke the doctrine of piercing the veil, albeit in exceptional circumstances, the law in India proscribes such structures at the outset. In addition, corporate law in India imposes severe restrictions on the movement of funds between group companies (such as

---

<sup>187</sup> See Marianne Bertrand, Paras Mehta & Sendhil Mullainathan, *Ferretting Out Tunneling: An Application to Indian Business Groups*, 117(1) QUARTERLY JOURNAL OF ECONOMICS 121, 121 (2002). holding companies and subsidiaries) whether by way of investment or loan transactions.<sup>191</sup> This makes transactions between group companies extremely onerous.<sup>192</sup>

Hence, on matters relating to corporate personality and structure, Indian corporate law has continued to hold firmly on to some colonial vestiges such as the *ultra vires* doctrine although the mother country and its other former colonies have jettisoned it along the way. On other matters such as group structures, India's approach has been far more restrictive not only compared to the colonial period, but also in the context of developments in the U.K. and other Western jurisdictions which have moved in the opposite (more liberal) direction.

#### B. CORPORATE FINANCE AND CAPITAL STRUCTURING

I begin this sub-part by exploring the evolution of the law relating to the equity finance in India, and how that compares with the colonial era as well as subsequent developments in England. Here, I find that India has made giant strides in introducing flexibility to companies as compared to the colonial period, and has also substantially kept with developments in England in this field (although the law in India continues to be somewhat more restrictive than England). This partially explains the explosive growth of India's equity capital markets over the last two decades since liberalization.<sup>193</sup>

A combination of company legislation and securities regulation established a conducive framework for securities offerings in the Indian markets, which permitted offerings of the type recognized internationally. The assumption of regulatory

---

<sup>191</sup> Companies Act, 2013, §§ 185-186.

<sup>192</sup> See also the restriction on related party transactions, *infra* Part IIIC2.

<sup>193</sup> While the equity capital markets have witnessed significant growth over the years, the debt markets (e.g. for corporate bonds) have failed to gather steam. See Vikramaditya Khanna & Umakanth Varottil, *Developing the Market for Corporate Bonds in India*, NSE WORKING PAPER (Mar. 2012), available at <http://ssrn.com/abstract=2021602>.

responsibilities by SEBI in 1992 resulted in a complete shift from fixed-price offerings to book-built offerings.<sup>194</sup> Under this regime, companies are free to invite bids from investors within certain indicative limits on the basis of a draft prospectus that contains all the necessary disclosures.<sup>195</sup> Pricing through regulatory intervention gave way to a market-based price discovery process. This enabled companies since the mid-to-late 1990s to raise billions of dollars in capital through public offering of shares and accompanied listings.<sup>196</sup> These factors triggered a dramatic shift in the Indian capital markets, particularly on the primary-markets front.<sup>197</sup>

SEBI's emphasis on disclosure-based regulation has witnessed a proliferation of disclosure norms for various types of capital raising activities by Indian companies. Over the last two decades, SEBI has gradually expanded the disclosure norms and prospectus requirements, culminating in the presently applicable SEBI (Issue of Capital and Disclosure Requirements) Regulations, 2009 (the "ICDR Regulations"). The ICDR Regulations contain detailed disclosure requirements to be complied with by companies undertaking various types of securities offerings. For public offerings, the ICDR Regulations are prescriptive and encompass disclosures pertaining to the business, risks, legal matters, capital structure and even the controlling shareholders and other entities within the group in which they hold shares. The requirements in the ICDR Regulations are so onerous that the disclosures required to give effect to a public offering in the Indian markets are comparable (or possibly even far exceed) those required in most

developed markets. The trajectory followed by SEBI in the last two decades demonstrates the pivotal nature of disclosure as a tool for securities regulation in the primary markets.<sup>198</sup>

Other measures have introduced flexibility in equity financing. Previously, public companies in India were restricted to two types of shares, i.e. preference shares and equity shares. However, another category was added in 2000 whereby Indian companies have been allowed to issue shares with differential rights as to dividend and voting.<sup>199</sup> Other hybrid instruments such as global depository receipts<sup>200</sup> and derivatives<sup>201</sup> have received express statutory recognition. All of these provide different financing options to Indian companies. Moreover, concepts such as employee stock options<sup>202</sup> and sweat equity enable the use of equity shares<sup>203</sup> to compensate employees. As far as the menu of options available for equity financing is concerned, the Indian legislation is quite modern.

However, when it comes to capital maintenance, corporate law in India continues to be fairly restrictive in nature. For instance, companies are still required to follow the concept of authorized capital<sup>204</sup> and par value of shares.<sup>205</sup> The concepts that were infused into Indian corporate law during the colonial period were intended to offer some form of creditor-protection.<sup>206</sup> However, these have since outlived their utility, as they had no correlation with the true value of the company that was of greater concern

---

<sup>198</sup> At the same time, the disclosure standards imposed in the secondary markets are considerably inferior in comparison with those in the primary markets. See Sandeep Parekh, *Integrated Disclosure – Streamlining the Disclosure Norms in the Indian Securities Market*, INDIAN INSTITUTE OF MANAGEMENT, AHMEDABAD WORKING PAPER 2005-01-04 (2005), available at <http://ssrn.com/abstract=653703>.

<sup>199</sup> Companies (Amendment) Act, 2000. Although there was intense debate about the issues surrounding shares with differential rights, they have been retained in the new legislation. Companies Act, 2013, § 43(a)(ii).

<sup>206</sup> DAVIES, *supra* note 166, at 260.

to its creditors.<sup>207</sup> Several Western jurisdictions have either not been following these requirements,<sup>208</sup> or have been following them partly.<sup>209</sup> Even some of the former colonies of the British Empire have since moved away from these somewhat archaic requirements.<sup>210</sup> Even though Britain and some of its colonies have migrated away from the concepts of authorized capital and par value of shares that were considered a form of creditor-protection in the colonial era, India has remained wedded to this concept, wherein no reform was suggested even during the most recent process of enacting the Companies Act, 2013.

The rather restrictive approach continues in other areas of capital maintenance and capital restructuring. For example, strict rules permit buyback of shares by a company only out of free reserves, share premium or the proceeds of a fresh issue of shares.<sup>211</sup> Moreover, there are ceilings in terms of total amounts that a company can pay out in a buyback (25% of paid up capital and free reserves) and a maximum percentage (25%) of shares it can buy back.<sup>212</sup> In order to protect the creditors, directors must issue a solvency certificate and the company must maintain a minimum debt-equity ratio following the buyback.<sup>213</sup>

The current regime in India regarding buyback of shares represents a radically different position from the colonial period when a company was not permitted to acquire its own shares under any circumstances whatsoever. The flexibility allowing companies to buy back their own shares was introduced only as late as 1999,<sup>214</sup> after

<sup>214</sup> Companies (Amendment) Act, 1999.

which it has taken a prominent place. It is somewhat comparable to the present English position, which too permits companies to purchase their own shares, although the conditions and requirements are somewhat differently structured with less rigid conditions.<sup>215</sup>

As a final matter relating to capital maintenance, the rule against financial assistance operates in an absolute manner whereby companies are prohibited from providing any form of financial assistance for the acquisition of its own shares.<sup>216</sup> While this rule has been controversial owing to its rigidity, a number of jurisdictions have made modifications over the years. Some carry whitewash provisions that enable shareholders to approve the financial assistance so long as the company continues to be solvent thereafter.<sup>217</sup> Others make the rule inapplicable to private companies.<sup>218</sup> In such a case, where a public company has been acquired, it can first be converted into a private company following which it could provide financial assistance.<sup>219</sup> This provides options for acquirers of companies to carry out leveraged acquisitions (whereby the financing of the acquisition is secured by the assets of the company acquired). The Indian position is rather rigid as it does not provide for any exceptions (such as whitewash provisions). Although the rule against financial assistance is not applicable to private companies, this is not altogether attractive as targets in large leveraged buyouts are likely to be public companies. Moreover, even if they are privatized following the acquisition, they could continue to be treated as public companies if they become

---

<sup>215</sup> Companies Act, 2006, Part 18. Other former British colonies have adopted varying approaches to capital maintenance and buyback of shares, ranging from several conditions imposed for buyback of shares as prevalent in Singapore to the emphasis largely on the solvency of the company for permitting a buyback in New Zealand. For a discussion, see Wee Meng Seng, *Reforming Capital Maintenance Law: The Companies (Amendment) Act 2005*, 19 SING. AC. L.J. 295 (2007).

<sup>216</sup> Companies Act, 2013, § 67(2).

<sup>217</sup> Singapore has adopted this approach. See Wee, *supra* note 215.

<sup>218</sup> Companies Act, 2006, § 678.

<sup>219</sup> *Paros Plc v Worldlink Group Plc* [2012] EWHC 394 (Comm) at ¶ 73, where an undertaking by the company while it was a public company to provide some sort of financial assistance to a purchaser of shares after it was re-registered as a private company (which was a pre-condition) was found to be lawful. For a brief discussion of this case, see GEOFFREY MORSE (ED), *PALMER'S COMPANY LAW* (1992), at ¶ 6904.1.

subsidiaries of acquirers that are themselves public companies.<sup>220</sup> For this reason, the rule against financial assistance is unduly restrictive in the Indian circumstances, with no meaningful exceptions contained in the legislation. Surprisingly, the law reform process that resulted in the Companies Act, 2013 does not seem to have considered this issue at all. To this extent, India's position continues to rely heavily on its colonial origins and has made little progress despite the advancement in equity markets and capital restructuring transactions.

In all, on matters of corporate finance and capital maintenance, on several aspects such as public offerings, options on types of securities and buyback of shares, the Indian legislation has evolved over a period of time. However, on other matters of capital maintenance such as the rule against financial assistance, it has failed to dislodge itself from its rigid stance that continues to affect transactions in the Indian context although the U.K. and some of its former colonies have adopted a more pragmatic approach given the commercial development of the times.<sup>221</sup>

### C. CORPORATE GOVERNANCE

While corporate governance<sup>222</sup> has been an inherent part of corporate law since its inception, the concept has gathered considerable momentum in India in the last two decades (and for a longer period of time in Western jurisdictions). During this period, India has adopted corporate governance measures from other jurisdictions, particularly

---

<sup>220</sup> See *supra* note 186 and accompanying text.

<sup>221</sup> As far as corporate restructuring is concerned, Indian corporate law continues to operate on the basis of concepts derived from the colonial era, which the U.K. too follows to a large extent. These include the concepts of scheme of compromise and arrangement (for effecting amalgamation of companies), contractual mergers (in very limited circumstances), schemes of reduction of capital, compulsory acquisitions and the like. See Umakanth Varottil, *Corporate Governance in M&A Transactions*, 24 NAT. L. SCH. IND. REV. 50; Vikramaditya Khanna, *Mergers & Acquisitions and Corporate Governance*, NSE QUARTERLY BRIEFING (Oct. 2013), available at [http://www.nseindia.com/research/content/res\\_QB3.pdf](http://www.nseindia.com/research/content/res_QB3.pdf).

<sup>222</sup> Corporate governance relates to the "system by which companies are directed and controlled." *Cadbury Committee Report*, *supra* note 142, at ¶ 2.5. It represents the set of checks and balances within the corporate structure that helps create long-term value enhancement for stakeholders in a company. See ROBERT A.G. MONKS & NELL MINOW, *CORPORATE GOVERNANCE* 2 (1995).

the U.S. and the U.K.<sup>223</sup> This despite considerable variances between conditions prevailing in those Western jurisdictions and locally in India. For example, the U.S. and the U.K. follow the “outsider” model of corporate governance<sup>224</sup> wherein most companies in those jurisdictions display dispersed shareholding and it is not too common to find controlling shareholders.<sup>225</sup> On the other hand, India follows the classic “insider” system<sup>226</sup> where most public companies are controlled (by virtue of dominant shareholding) by either business families or the state.<sup>227</sup>

Although there could be several possible methods to analyze the corporate governance issues in a legal system (and more so in comparison with other systems), here I resort to the “agency problems” paradigm that provides an elegant underlying framework.<sup>228</sup> As explained in an influential book on the subject,<sup>229</sup> the effort of corporate law is “to control conflicts of interest among corporate constituencies”.<sup>230</sup> These conflicts are referred to in economic literature as “agency problems”.<sup>231</sup>

<sup>230</sup> *Id.* at 35.

<sup>231</sup> For a detailed analysis of agency theory in economic literature, see J. Michael Jensen & William Meckling, *Theory of the Firm: Managerial Behavior, Agency Costs, and Ownership Structure*, 3 J. FIN.

Corporate law and corporate governance literature define three generic agency problems.<sup>232</sup> The first agency problem relates to the conflict between the company's managers and its owners (being the shareholders).<sup>233</sup> Hereinafter referred to as the "manager-shareholder agency problem", such conflict exists largely in jurisdictions which manifest diffused shareholding in companies. This is due to collective action problems and the resultant inability of shareholders to properly monitor the actions of managers. The second relates to the conflict between the majority or controlling shareholders on the one hand and minority shareholders on the other.<sup>234</sup> Such conflict, which is referred to hereinafter as the "majority-minority agency problem" is largely prevalent in jurisdictions that display concentrated shareholding where the interests of minority shareholders are significantly diluted. The third agency problem relates to the conflict between the owners and controllers of the firm (such as the shareholders and managers) and other stakeholders (such as creditors, employees, consumers and public), with many of whom the company may enter into a contractual arrangement governing their affairs *inter se*.<sup>235</sup> This conflict, referred to hereinafter as the "controller-stakeholder agency problem" exists both in jurisdictions that have diffused shareholding as well as those that have concentrated shareholding, but its role is accentuated in those that have concentrated shareholding.<sup>236</sup>

---

ECON. 305 (1976). For a simpler expression of the agency analysis, see KRAAKMAN, ET. AL., *supra* note 229, at 35, noting that:

an 'agency problem'—in the most general sense of the term—arises whenever the welfare of one party, term the 'principal,' depends upon actions taken by another party, termed the 'agent.' The problem lies in motivating the agent to act in the principal's interest rather than simply the agent's own interest. Viewed in these broad terms, agency problems arise in a broad range of contexts that go well beyond those that would formally be classified as agency relationships by lawyers.

<sup>234</sup> *Id.*

<sup>235</sup> *Id.*

<sup>236</sup> There is some correlation between ownership structure and the shareholder-stakeholder focus. Interesting political explanations have been proffered for this phenomenon. Professor Roe notes that "when we line up the world's richest nations on a left-right political continuum and then line them up on a close-to-diffuse ownership continuum, the two correlate powerfully." Mark J. Roe, *Political Preconditions to*

Through this “agency problems” paradigm, I now discuss the evolution of corporate law in post-colonial India and how it has sought to address these different agency problems.

### *1. Controlling the Managers*

The manager-shareholder agency problem is of limited relevance in India due to the general concentration of shareholding. However, looking at historical evolution in India, legal instruments were indeed utilized to address this agency problem that existed during independence. As we have seen,<sup>237</sup> the managing agents that proliferated during the colonial era gave rise to the manager-shareholder agency problem. The managing agents of the time held only a small percentage shareholding in the companies they managed. Since the outside investors were not only large in number and unrelated to the managers, they were also disinterested in participating in the management of the companies. Arguably, the governance issues afflicting Indian companies that were managed during the colonial period by the managing agents were somewhat akin to those faced by the classic Berle & Means corporation in the U.S.<sup>238</sup> Although there was initial hesitation to confront this agency problem directly both towards the end of the colonial period and immediately upon India’s independence,<sup>239</sup> sufficient political will

*Separating Ownership from Corporate Control*, 53 STAN. L. REV. 539, 539 (2000). See also Alan Dignam & Michael Galanis, *Corporate Governance and the Importance of Macroeconomic Context*, 28 OXFORD J. LEGAL STUD. 201, 202 (2008).

<sup>237</sup> See *supra* Part IIA4.

<sup>238</sup> These companies displayed the separation of ownership and management (control). See ADOLF A. BERLE & GARDINER C. MEANS, *THE MODERN CORPORATION AND PRIVATE PROPERTY* 66 (1940 [c1932]). A comparative study of the Berle & Means corporation in the U.S. and companies in India that were managed by the managing agencies in India during the colonial period and the different agency problems faced by them respectively would itself be an interesting topic for further research, which will have to await another day.

<sup>239</sup> See *supra* notes 101-107 and accompanying text.

was mustered in the late 1960s to eliminate the institution of managing agencies altogether.<sup>240</sup>

To that extent, India's experience in dealing with the manager-shareholder agency problem is somewhat distinctive. The transplant of English law into India until 1960s did not specifically address the problems relating to managing agencies. Although English law was focused on addressing the manager-shareholder agency problem generally, the indigenous innovation of managing agencies in India required a more targeted solution. This required the Indian Parliament to make a clean break from the colonial era in eliminating the concept of managing agencies altogether. Thereafter, the agency problems that were more prevalent in India relate to those between controlling shareholders and minority shareholders, wherein neither the colonial laws nor the corporate governance regime as it has evolved in England provide any solution.

## 2. *Protecting the Minority*

Due to the concentration of shareholding in Indian companies, the majority-minority agency problem is rampant. Hence, the role of corporate law and governance norms ought to be to address that specific problem. Until recently, corporate law in India failed to directly address this problem. In the two decades following liberalization, several corporate governance norms were gradually introduced in the Indian context.<sup>241</sup> The efficacy of importing several corporate governance concepts into an emerging economy like India from the developed economies like the U.S. and U.K. is open for debate.<sup>242</sup> Any problems with regard to transplantation of these corporate governance

---

<sup>240</sup> See *supra* notes 116-118 and accompanying text.

<sup>241</sup> For a discussion of these norms and how they were introduced, see *supra* Part IID.

<sup>242</sup> Jairus Banaji & Gautam Mody, *Corporate Governance and the Indian Private Sector*, UNIVERSITY OF OXFORD, QUEEN ELIZABETH HOUSE WORKING PAPER NUMBER 73, 8 (2001), available at <http://www3.qeh.ox.ac.uk/pdf/qehwp/qehwps73.pdf>.

concepts are exacerbated by the differing political, social and economic considerations that operate in these two sets of jurisdictions, namely the U.S. and U.K. (the outsider system) on the one hand, and India (an insider system) on the other.<sup>243</sup> As I have argued elsewhere, several corporate governance concepts remained unimplemented effectively in India, and this implementation failure raises questions regarding the viability of the transplant itself.<sup>244</sup>

Just to illustrate this point further, during this phase, one key transplant related to the concept of board independence, which was transplanted to India from the U.S. and the U.K.<sup>245</sup> As mentioned earlier, controlling shareholders in Indian companies possess significant voting power, both *de jure* and *de facto*, and can determine the composition of the boards of most Indian public listed companies by exercising their voting power to appoint or remove directors.<sup>246</sup> This holds good for the appointment of independent directors as well. Hence, although independent directors (a seemingly critical component of the corporate governance norms) are required to act in the general interests of the company and the shareholder body as a whole and as monitors of managers and controlling shareholders, in practice they are generally likely to owe their *de facto* allegiance to the controlling shareholders, as such directors depend on the controlling shareholders for their board seats (as well as remuneration and other terms and conditions). In view of this, independent directors may have a tendency to passively approve actions taken by controlling shareholders and the managers (whose appointments again are subject to be influenced substantially by the controlling

---

<sup>243</sup> See, Troy Paredes, *A Systems Approach to Corporate Governance Reform: Why Importing U.S. Corporate Law Isn't the Answer*, 45 WM. & MARY L. REV. 1055, 1058 (2004).

<sup>244</sup> Varottil, *supra* note 119.

<sup>245</sup> For a more detailed analysis on this transplant, see Umakanth Varottil, *Evolution and Effectiveness of Independent Directors in Indian Corporate Governance*, 6 HASTINGS BUS. L.J. 291 (2010).

<sup>246</sup> In India, the appointment of each director is to be voted on individually at a shareholders' meeting by way of a separate resolution. Each director's appointment is to be approved by a majority of shareholders present and voting on such resolution. Hence, controlling shareholders, by virtue of being able to muster a majority of shareholders present and voting on such resolution, can control the appointment of every single director on the board. Companies Act, 1956, § 263. Similarly, any director may be removed before the end of her term without cause by a majority of shareholders present and voting on such resolution. Companies Act, 1956, § 284.

shareholders). Proceeding on the assumption that one of the fundamental purposes of corporate governance in India is to address the controller-minority agency problem by protecting the interests of the minority shareholders from actions of the controlling shareholders, this purpose is defeated at its very source because the instrumentality of independent directors that has been created to solve this agency problem is itself subject to potential dominance by the controlling shareholders.<sup>247</sup> This illustration of the independent director concept is replete with problems that are likely to be encountered when concepts from outsider systems are transplanted to insider systems without adequate consideration of inherent differences in corporate structures or other relevant factors.

The latest round of corporate law reforms have, however, shifted away from a wholly transplant-oriented approach to a more indigenous approach that takes into account the local circumstances, particularly the concentration of shareholding in Indian companies and hence the presence of the majority-minority agency problem. The Companies Act, 2013 brings about substantial changes to the concept of board independence and also introduces other measures such as rules pertaining to related-party transactions, all of which seek to directly address the majority-minority agency problem. Under the new legislation, independent directors are to be chosen by a nomination committee of the board, which has been made mandatory.<sup>248</sup> Moreover, a widening monitoring role of independent directors also extends specifically to protecting the interest of the minority shareholders, thereby providing a pointed solution to the agency problem prevalent in India.<sup>249</sup> The altered role of independent directors under the contemporary legislation is an effort to devise indigenous solutions as opposed to simply relying on transplants.

---

<sup>247</sup> As controlling shareholders have vast powers to determine the selection of the independent directors, it is likely that controlling shareholders would most likely appoint persons who would be passive to their decision-making. Further, even independent directors who may wish to act in the larger interests of the company may be precluded from doing so because of the wide-ranging powers that controlling shareholders exercise.

<sup>248</sup> Companies Act, 2013, § 178.

<sup>249</sup> *Id.*, Schedule IV, ¶ II(5),(6),(8).

The enormous stress placed on regulating related-party transactions under the new legislation is yet another evidence of autochthony. Previously transplanted legal regimes pertaining to corporate governance in India paid short shrift to related-party transactions as they are less relevant in jurisdictions such as the U.K. (and the U.S.) where shareholding is diffused. They are, however, rampant where shareholding is concentrated and corporate groups structures are common, such as in India.<sup>250</sup> The Companies Act, 2013 introduces strict measures to regulate related-party transactions. For instance, such transactions are now required to be approved by the board of directors of the company, and in the case of material transactions they also require the approval of the shareholders (wherein a shareholder who is a related party is disallowed from voting).<sup>251</sup> Disinterestedness and independence in decision-making would ensure that the transactions are carried out at arm's length and are not abusive in nature so as to unduly transfer value from a company to a related party (such as a controlling shareholder) so as to adversely affect the interests of the minority shareholders.

These illustrations are indicative of India's shift away not only from colonial era laws (that did not encompass matters of corporate governance in as much detail), but also from developments in the U.K. (as well as perhaps other former colonies such as Australia and Canada) in recognition of the specific majority-minority agency problem that is prevalent in India.

---

<sup>250</sup> Related-party transactions are defined as those transactions between a company, its subsidiaries, employees, its controlling shareholders, management or members of their immediate family, and affiliates. While related-party transactions are often beneficial to companies, they also have the potential to be abusive in nature thereby unduly benefiting the controlling shareholders while adversely affecting the interests of minority shareholders. See OECD, *Guide on Fighting Abusive Related Party Transactions in Asia 11* (2009).

<sup>251</sup> Companies Act, 2013, § 188.

### 3. Enabling Other Stakeholders

The question whether companies should be run for the benefit of their shareholders or whether the interests of other stakeholders must be taken into account is a vexed one,<sup>252</sup> and directly attracts the controller-stakeholder agency problem. The colonial law in India was unequivocal in its zeal to protect shareholders so as to enable companies to attract capital.<sup>253</sup> Corporate law did not play any role at all in taking cognizance of the interests of non-shareholder constituencies. This position continues immediately following decolonization, but the change in philosophy began taking shape in the 1960s with amendments to the Companies Act, 1956, which was also consistent with the escalation of the socialistic sentiment of the period.<sup>254</sup> In this sub-part, I seek to demonstrate that the legal position has evolved substantially in the post-colonial era such that corporate law's approach towards viewing the company as a private matter has given way to an approach that considers the company as carrying wider societal ramifications and affecting public interest. This vision of the corporate entity not only contrasts with the colonial origins of Indian corporate law, but stands at considerable variance with the English position, which continues to be staunchly shareholder-oriented.

Following decolonization, consistent with its journey through years of socialism, the role of company law in India has extended beyond merely the protection of shareholders.<sup>255</sup> It encompasses the protection of employees, creditors, consumers and society. For instance, employees obtain certain special rights under company law, such

<sup>255</sup> Tarun Khanna & Krishna Palepu, *Globalization and Convergence in Corporate Governance: Evidence from Infosys and the Indian Software Industry*, 35 J. INT'L BUS. STUDIES 484, 500 (2004) (laying out the debate in the context of protection of employees using the stakeholder theory).

as preferential payment for dues in case of winding up of a company,<sup>256</sup> and also the right to be heard in case of significant proceedings involving a company such as in a scheme of arrangement (merger, demerger or other corporate restructuring)<sup>257</sup> or in a winding up<sup>258</sup> of the company. As far as creditors are concerned, while company law does provide them with the standard rights and remedies,<sup>259</sup> other special laws confer further corporate law rights such as the ability of the creditors to convert their loans into equity of the debtor company and, more specifically from a corporate governance standpoint, to appoint nominee directors on boards of debtor companies.<sup>260</sup> These rights are seemingly provided to protect the interests of the creditors. Building upon the element of “public interest”, affected parties may exercise remedies in case the affairs of a company are carried out in a manner prejudicial to public interest,<sup>261</sup> or if a scheme of arrangement<sup>262</sup> is not in consonance with public interest.<sup>263</sup> For example, while according its sanction to a merger, demerger or corporate restructuring that is carried out through a scheme of arrangement, the court must take into consideration the effect of such a transaction on public interest, a matter that is alien to English law.<sup>264</sup>

---

<sup>256</sup> Companies Act, 2013, § 325.

<sup>257</sup> Companies Act, 2013, §§ 230-232. *See also In Re, River Steam Navigation Co. Ltd.*, (1967) 2 Comp. L.J. 106 (Cal.) (holding that in considering any scheme proposed, the Court will also consider its effects on workers or employees); *In Re, Hathisingh Manufacturing Co. Ltd.*, (1976) 46 Comp. Cas. 59 (Guj.) and *Bhartiya Kamgar Sena v. Geoffrey Manners & Co. Ltd.*, (1992) 73 Comp. Cas. 122 (Bom.) (approving the proposition that while sanctioning a scheme of arrangement the court should consider not merely the interests of the shareholders and creditors but also the wider interests of the workmen and of the community).

<sup>258</sup> Companies Act, 2013, § 282. *See also National Textile Workers' Union v. Ramkrishnan (P.R.)*, A.I.R. 1983 SC 75 (holding that workers of a company have a right to appear and be heard in support or opposition of a winding up petition).

<sup>259</sup> These include the right to initiate a winding up of the company. Companies Act, 2013, § 272(1)(b), which is a customary company law right conferred on creditors in most jurisdictions.

<sup>260</sup> *See e.g., State Bank of India Act, 1955* (Act No. 23 of 1955), s. 35A.

<sup>261</sup> Companies Act, 2013, § 241(1)(a). *See also supra* note 115.

<sup>262</sup> Mergers, demergers and other forms of corporate restructuring are usually effected through a scheme of arrangement that not only requires the approval of different classes of shareholders and creditors, but also the sanction of the relevant court of law. *See Jennifer Payne, Schemes of Arrangement, Takeovers and Minority Shareholder Protection*, 11 J. CORP. L. STUD. 67 (2011).

<sup>263</sup> Companies Act, 2013, § 232.

<sup>264</sup> *Hindustan Lever Employees' Union v. Hindustan Lever Limited*, AIR 1995 SC 470, ¶ 5:

What requires, however, a thoughtful consideration is whether the company court has applied its mind to the public interest involved in the merger. In this regard the Indian law is a departure from the English law and it enjoins a duty on the court to examine objectively and carefully if the merger was not violative of public interest. No such provision exists in the English law.

If Indian corporate law was already stakeholder-oriented during the socialist era, the recent reforms culminating in the Companies Act, 2013 stress that further in several ways. Here, I deal with two such reforms that are indicative of this move, viz. (i) expansion of directors' duties, and (ii) corporate social responsibility.

Hitherto, directors of Indian companies had negligible guidance under company law as regards their duties and liabilities. The preexisting Companies Act, 1956 did not explicitly stipulate directors' duties, which made it necessary to fall back on common law principles (to be articulated by courts while delivering specific decisions). The statutory uncertainty was compounded by the absence of significant cases of director duties and liabilities before Indian courts. This somewhat unsatisfactory situation has been mended in the Companies Act, 2013, which is rather explicit about directors' duties. The new provisions not only provide greater certainty to directors regarding their conduct, but also enable the beneficiaries as well as courts and regulators to judge the discharge of directors' duties more objectively.

More important for our present purpose, the Companies Act, 2013 extends the stakeholder principle further while codifying directors' duties. It provides:

A director of a company shall act in good faith in order to promote the objects of the company for the benefit of its members as a whole, and in the best interests of the company, its employees, the shareholders, the community and for the protection of environment.<sup>265</sup>

Even if there was a doubt under previous legislation as to the extent to which stakeholder interests are to be considered by directors of a company, it has been put to rest in the new legislation. In other words, shareholders are not the only constituency

---

<sup>265</sup> Companies Act, 2013, § 166(2).

that deserves the attention of directors; other constituencies such as employees and even the community and the environment are to be considered by the directors.

While the stakeholder approach was considered during the latest English company law reform process, matters were resolved rather differently. There, the Company Law Review came up with proposals to cater to stakeholder interests.<sup>266</sup> Essentially, two approaches that were considered: (i) the pluralist approach, which states that “company law should be modified to include other objectives so that a company is required to serve a wider range of interests, not subordinate to, or as a means of achieving, shareholder value ..., but as valid in their own right”,<sup>267</sup> which represents an expansive conception of stakeholder interest; and (ii) the enlightened shareholder value (“ESV”) approach, which takes the position that the ultimate objective of company law to generate maximum shareholder value is also the best means of securing protection of all interests and thereby overall prosperity and welfare.<sup>268</sup> In other words, the latter approach conceives of a merger of interests of stakeholders and shareholders by adopting the position that if the company acts to preserve stakeholder interests, then that would necessarily bring about enhancement of shareholder value. However, after some extensive debate, it is the ESV model that has received statutory recognition in the UK. This appears to be a hybrid approach that is primarily for the benefit of shareholders, but also obliquely takes into account the interests of other stakeholders.<sup>269</sup> Notwithstanding this compromise, it is clear that in case of conflict between various interests, the directors must prioritize shareholders’ interests, which is the paramount goal.<sup>270</sup>

---

<sup>266</sup> *Supra* note 166.

<sup>267</sup> *Id.* at ¶ 5.1.3 (explaining that the approach is “pluralist because it argues that the interests of a number of groups should be advanced without the interests of a single group (shareholders) being overriding”).

<sup>268</sup> *Id.* at ¶ 5.1.2.

<sup>269</sup> Companies Act, 2006, § 172(1).

<sup>270</sup> CHRISTOPHER M. BRUNER, CORPORATE GOVERNANCE IN THE COMMON-LAW WORLD: THE POLITICAL FOUNDATIONS OF SHAREHOLDER POWER 34, 44 (2013).

On the other hand, in the context of the aforesaid dichotomy, the Companies Act, 2013 in India has preferred to adopt the pluralist approach by providing recognition to both stakeholders and shareholders, without necessarily indicating a preference to either. Despite the superficial similarity between the English and Indian legal provisions on directors' duties, there is a vital distinction in that shareholders continue to occupy a pivotal position in England, whereas in India they are only one among a number of constituencies that command the attention of directors.

Related to this is the newly introduced requirement of CSR,<sup>271</sup> which has gained considerable traction. The concept of social responsibility of corporations is not novel, and has been part of the indigenous thinking during the colonial era.<sup>272</sup> After much debate, CSR found its place in the Companies Act, 2013 whereby every company of a certain size is to announce a CSR policy. More importantly, India is one of the earliest countries to require large companies to spend at least two percent of its average net profits made during the three immediately preceding financial years in pursuance of its CSR policy towards specified activities.<sup>273</sup> During the legislative process, there was an intense debate as to whether the spending requirements must be made mandatory, but in the end due to a compromise the position resulted in a "comply-or-explain" approach although the wording of the statutory provision largely operates as a mandate.<sup>274</sup> While there is strident criticism against such a broad and overarching CSR policy on various counts, the requirements are here to stay.<sup>275</sup> These developments are a far cry from the position that prevailed during the colonial period, which was a single-minded focus on

---

L. & POL'Y J. 269 (2012); Afra Afsharipour & Shruti Rana, *The Emergence of New Corporate Social Responsibility Regimes in China and India*, 14 U.C. DAVIS BUS. L.J. (forthcoming, 2014).

shareholder interests. They also take India in a different direction compared to the largely shareholder-oriented focus that continues to operate in contemporary U.K. While the corporation has acquired public overtones in India, which have only increased over time, the broader stakeholder interest is subservient to shareholder value enhancement in the U.K. context.

In all, we find diverging philosophies in corporate governance that operate in India and its colonizer. Viewed from the agency problems paradigm, the manager-shareholder agency problem that is the focus of corporate law in the U.K. hardly exists in India. Similarly, the recent focus of the Indian legislators in dealing with the majority-minority agency problem is of limited interest in the U.K. Finally, while shareholders continue to hold the attention of corporate managements in the U.K., other stakeholders are entitled to the wider protection of corporate law in India. Here too, transplant has given way to autochthony.

#### D. CORPORATE LAW ENFORCEMENT MACHINERY

Corporate law may be enforced either through the public enforcement apparatus or through private action. In public enforcement, the state (or an independent regulatory body) initiates proceedings against alleged violators of corporate law with a view to imposing civil or criminal penalties.<sup>276</sup> Private enforcement consists of legal action by the victims of wrongdoing (who are private parties) to recover damages or obtain injunction by way of a civil suit.<sup>277</sup> The “legal origins” strain of literature posits that in common law countries the judiciary plays an important role in enforcing investor rights, thereby enhancing the value of capital markets.<sup>278</sup> On the other hand, civil law countries tend to rely heavily on governmental intervention in regulating the capital markets.

---

<sup>276</sup> Bernard Black, *The Core Institutions that Support Strong Securities Markets*, 55 BUS. LAW. 1565, 1576-77 (2000).

<sup>277</sup> *Id.* at 1577-78.

<sup>278</sup> *Supra* note 1.

In India, during the colonial period, there was greater emphasis on private enforcement and very little on public enforcement. This is consistent with the approach in England (which largely continues to date) wherein private enforcement plays a significant role in enforcing corporate law. However, beginning the socialist phase in Indian corporate law history, the focus shifted rather significantly towards public enforcement whereby the government obtained extensive powers of investigation and other forms of enforcing corporate law.<sup>279</sup> This approach was fortified after SEBI's establishment when it obtained significant powers of enforcement.

It is simple at first blush to attribute the growth to India's legal system through civil liability and its enforcement through the judiciary. This would be consistent with the "legal origins" notion of investor protection due to India's colonial legal heritage.<sup>280</sup> India not only has a sufficiently robust substantive law on investor protection, but the independent judicial system drawn from the common law tradition allows for judges to mold the law to suit specific circumstances and thereby adapt to the dynamicity in the capital markets.

However, as I argue elsewhere,<sup>281</sup> the efficacy of India's legal system as a tool for enforcing corporate and securities laws necessitates a more nuanced treatment. Counter-intuitively, India's common law legal system operating through the judiciary has not played a vital role in the development of the capital markets through the imposition of civil liability upon issuer companies or the compensation of investors for losses due to misstatements. Despite the existence of substantial rules for civil liability and compensation and the presence of an elaborate court system, the associated conditions for the judiciary to make an impact on corporate law and investor protection are

---

<sup>279</sup> See *supra* Part IIC.

<sup>280</sup> Armour &, *supra* note 3, at 499; Afra Afsharipour, *Rising Multinationals: Law and the Evolution of Outbound Acquisitions by Indian Companies*, 44 UC DAVIS L. REV. 1029, 1047-49 (2011).

<sup>281</sup> Umakanth Varottil, *The Protection of Minority Investors and the Compensation of Their Losses: A Case Study of India*, in PIERRE-HENRI CONAC & MARTIN GELTER, GLOBAL SECURITIES LITIGATION AND ENFORCEMENT (forthcoming), available at <http://ssrn.com/abstract=2421098>.

conspicuous by their absence.<sup>282</sup> The Indian court system is plagued by delays, costs, and other inefficiencies. Nearly 32 million cases are pending before different levels within the Indian judiciary thereby causing a significant strain on the system.<sup>283</sup> Cases can on average take 15 years to achieve final outcomes.<sup>284</sup> For this reason, civil liability and compensation of investors' losses have almost never been utilized to any meaningful extent in India as a tool for enforcing corporate law.

By way of comparison, under English law while case law forms the bulwark of the evolution in areas of corporate such as directors' duties, there is sparse case law in post-colonial India in this crucial area of the law despite over half a century of judicial experience in implementing the Companies Act, 1956.<sup>285</sup> Similarly, the shareholder remedy of derivative law suits, an important form of private enforcement of directors' duties, has been hardly utilized in India.<sup>286</sup>

Recognizing the need for private enforcement of corporate law, the Companies Act, 2013 has introduced a statutory shareholder class action mechanism.<sup>287</sup> In order to obviate the delays faced before the regular court system, the legislation proposes the establishment of a specialized body in the form of the National Company Law Tribunal

<sup>285</sup> Paterson, *supra* note 153, at 50. The lack of case law on directors' duties has made the law somewhat less certain in India compared to other jurisdictions where the judiciary sets the standards for director conduct. It has also be argued that without local judicial pronouncements, the law may appear rather static. For an example from the Singapore insurance sector, see Chen, *supra* note 19.

("NCLT") that will hear shareholder class actions and other corporate law disputes.<sup>288</sup> Nevertheless, I am not sanguine about their effectiveness due to the lack of institutional factors necessary for their utilization. For example, India follows the English rule on costs, whereby the loser pays the reasonable costs of the opponent as ordered by the courts.<sup>289</sup> This may act as a disincentive to shareholders to bring suits even if they have a strong case on the merits. Moreover, in India the costs are not limited to attorneys' fees. Because investor actions are brought before the regular civil courts, plaintiffs usually have to pay stamp duty and court fees, which may be significant in some states. Contingency fees are one way to motivate entrepreneurially minded attorneys to take on riskier suits with the likelihood that they would partake a portion of the proceeds if the suit were successful. Although this system has worked in the U.S. and a number of other jurisdictions, contingency fees are prohibited in India<sup>290</sup> thereby disincentivizing plaintiff attorneys from taking on riskier suits. Although the establishment of the NCLT will eliminate some of the costs such as stamp duty and court fees, the lack of institutional factors that promote a class action culture make it unlikely that private enforcement will obtain the necessary fillip.

India's enforcement is vastly different from that of the U.K. on yet another count, particularly in the area of corporate governance. In order to implement corporate governance norms, legal systems have utilized two broad approaches. One relates to the use of a voluntary code of corporate governance. Under this approach, either the government or an industry body (self-regulator) may establish a code of conduct for companies. This is often referred to as "soft law".<sup>291</sup> Although there is no compulsion to

---

<sup>288</sup> Although the constitutional validity of the establishment of the NCLT was previously upheld by the Supreme Court of India, subject to certain conditions and modifications in *Union of India v. R. Gandhi*, [2010] 100 SCL 142 (SC), its potential establishment under the Companies Act, 2013 has been challenged again more recently before the courts, which makes it likely that there would be further delays before the NCLT can see the light of day. See Indu Bhan, *What's the role of tribunals?*, THE FINANCIAL EXPRESS (Jan. 22, 2014).

comply with such a code, companies are required to make appropriate disclosures on whether they comply with the code, or alternatively to explain the reasons for non-compliance. The Combined Code in the UK is a classic example of such a voluntary “comply-or-explain” approach.<sup>292</sup>

While India began briefly with the “comply-or-explain” approach,<sup>293</sup> it quickly migrated to a mandatory approach towards corporate governance,<sup>294</sup> which has since continued. This resonates with the legal tradition and enforcement culture in India, wherein in the postcolonial period there has been reliance on government regulation of the corporate sector. Since independence, the Indian industry has been subject to close regulation and supervision by the government through mandatory regulation.<sup>295</sup> This approach has become further solidified with the enactment of the Companies Act, 2013, which encapsulates detailed corporate governance provisions. The push towards mandatory rules in India has therefore become complete.<sup>296</sup>

Hence, the enforcement machinery in corporate law in India has undergone a sea change not just compared to colonial time (which is understandable given the pace of developments in India’s corporate sector since decolonization), but it has developed in a direction that is very different from that of its colonizer.

As this Part indicates through the extensive use of various legal concepts that apply under contemporary Indian corporate law, not only has there been a break from

<sup>296</sup> At the same time, mandatory rules of corporate governance imposed through legislation might be subject to criticism. Given that corporate governance is dynamic and requires a flexible approach with constant updating in accordance with developments in the markets, addressing ongoing concerns in an efficient manner would be impossible through legislative amendments.

India's colonial past, but India has also charted its own course which is considerably different from those of Britain as well as several of its leading former colonies.

#### IV. LESSONS & CONCLUDING REMARKS

In this article, I have analyzed the evolution of corporate law in India since the colonial period and the considerable shifts it has witnessed in the post-colonial era. While Indian corporate law began as a legal transplant from England, subsequent amendments and reforms have moved it further away from its origin as they have been focused either on finding solutions to local problems or borrowing from other jurisdictions such as the U.S. To that extent, decolonization has had a significant effect of radically altering the course of Indian corporate law. Although the shift was not evident in the period immediately following decolonization, it began to take shape about a decade thereafter. Current Indian corporate law not only represents a significant departure from its colonial origins, but the divergence between Indian law and English law as they have developed since independence has been increasing. This study offers some valuable lessons that add to the theoretical debates across various planes, including on comparative corporate law and post-colonial legal systems. Here, I summarize some of the key messages emanating from the analysis.

*First*, as I seek to demonstrate in this paper, the corporate law in India has evolved in a rather fundamentally different fashion from that in England despite both countries being part of the “common law” family and one being a former colony of the other. This raises doubt about the bolder and more free ranging claims made by the proponents of the “legal origins” thesis as to the differences between the “common law” systems and the “civil law” systems.<sup>297</sup> A more nuanced approach ought to be

---

<sup>297</sup> *Supra* note 1.

taken while considering the effect of dispersion in the law among systems that share the same legal family.<sup>298</sup>

This assertion can be supported by several findings in this paper. For example, although “common law” systems are generally understood to be shareholder-oriented, there is ample evidence of India adopting a broader stakeholder approach. While “common law” systems tend to rely on judge-made law in the development of their jurisprudence, in the corporate sphere India has largely relied on a codification process rather than through judge-made law (which is almost non-existent in this subject area). Consequently, greater reliance is placed on public enforcement of corporate law rather than private enforcement. At one level, if a combination of these factors is taken into account, India begins to resemble the typical civil law jurisdiction where these factors are present. But that is too simplistic an analysis. For example, nothing explains why India has not gone as far as civil law jurisdictions in insisting on codetermination whereby workers obtain a seat on the board of directors and hence participation in the management of the company.<sup>299</sup>

India’s position as a member of the “common law” family is different from others, particularly the U.K. This is on account of historical, economic and political reasons that have determined its destiny in a manner that is different from that of its colonizer. The economic policies of the Indian government following decolonization appear to have had some role to play by which some of the socialist mindset and government oversight of corporate affairs continues to the day.

*Second*, India’s initial corporate law during the colonial period was a direct transplantation of English law on an ongoing basis. Such a legal transplant did not take into account local conditions. For instance, the law was focused on enabling British businesses to trade with India, and failed to heed to the indigenous business

<sup>298</sup> My approach resonates with the literature set out in *supra* note 4. *See also* Mahy, *supra* note 20.

<sup>299</sup> Spamann, *supra* note 4, at 1866-67.

organizations, which did not find any place in corporate law.<sup>300</sup> Similarly, the transplanted legislation paid little regard to the problem of managing agencies, which did not pose any significant problem in England.

Resistance to the transplanted legal system began occurring only in the post-colonial scenario. Some signs of decoupling are evidenced by legislative reforms such as the abolishment of the managing agency systems. More importantly, the transplanted legislation was incapable of addressing local issues in the post-colonial era due to which ongoing reliance on English law for legislative reform in India came to an end. All future corporate law reform processes looked inward for solutions to problems and did not look at all to the origin country for guidance. This suggests that transplants that do not take cognizance of local circumstances may be present formally but may not possess much functional effect. Moreover, following the lapse of time, one may witness change at the formal level itself.

Finally, a comparison of the historical colonial experience in the functioning of the transplanted legal system and the more contemporary experience in the post-colonial period suggests fragility in the foundations of the transplant. It is also an indication that formal transplants may be inevitable during the colonial era, but following decolonization such transplants could be called into question. India's post-colonial economic history also appears to have a significant role to play in the evolution of corporate law. A *laissez faire* policy at independence gave way to socialist propensities for nearly three decades followed by a process of gradual liberalization of the economy.

This paper presents a macro-comparative analysis of the evolution of corporate law in India across two planes. First, it compares the law as it evolved in the colonial period, and how decolonization operated as a break from the past due to which the

---

<sup>300</sup> See *supra* Part IIA3.

post-colonial developments took on a rather different tone. Second, it compares the post-colonial evolution of corporate law in India and England to determine the different direction that India took from its fellow-member of the “common law” family. The findings presented herein take into account not only the legal evolution, but also places it in the context of historical, economic and political factors that were at play in determining the legal regime from time to time.

Several avenues for further research arise from this paper. For instance, research in specific areas of corporate law may be analyzed in depth to test the conclusions made in this paper at a macro-level. Such a body of literature may not only aid in our understanding of post-colonial legal developments, but also operate as a reflective and introspective exercise that will help better understand contemporary corporate law in India.
